|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....  | 1           |
| 3                  | Terms and definitions .....   | 1           |
| 4                  | Classification .....  | 3           |
| 4.1                | Low-pressure fender types .....   | 3           |
| 4.2                | Initial internal pressure .....   | 3           |
| 5                  | Ordering information .....  | 3           |
| 5.1                | Information to the manufacturer .....   | 3           |
| 5.2                | Information from the manufacturer .....                                       | 3           |
| 6                  | Low-pressure fender requirements .....  | 3           |
| 6.1                | Clamped end fender requirements .....   | 3           |
| 6.2                | Moulded end fender requirements .....   | 4           |
| 6.3                | Size requirements .....   | 5           |
| 7                  | Performance .....   | 5           |
| 7.1                | Specification of performance .....  | 5           |
| 7.2                | Performance curves .....  | 5           |
| 7.3                | Fender performance .....  | 5           |
| 8                  | Performance confirmation of prototype fender test .....                       | 5           |
| 8.1                | General .....   | 5           |
| 8.2                | Performance test, parallel compression test .....                             | 6           |
| 8.3                | Angular compression test .....  | 6           |
| 8.4                | Durability test .....   | 6           |
| 8.5                | Compression recovery test .....   | 7           |
| 8.6                | Puncture resistance test .....  | 7           |
| 8.7                | Recording condition .....   | 7           |
| 9                  | Test and inspection for commercial fenders .....                              | 7           |
| 9.1                | General .....   | 7           |
| 9.2                | Test of the fender body material .....  | 7           |
| 9.3                | Dimensional inspection .....  | 8           |
| 9.4                | Air leakage test .....  | 8           |
| 9.5                | Hydrostatic pressure test .....   | 8           |
| 10                 | Marking .....   | 9           |
| 11                 | Documentation .....   | 9           |
| 12                 | Inspection and evaluation by a qualified independent inspection service ..... | 10          |
| Bibliography ..... |   | 14          |
