

ISO 19697:2016-11 (E)

Ships and marine technology - Navigation and ship operations - Electronic inclinometers

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Requirements	3
4.1	General	3
4.2	Functionality	3
4.3	Information	3
4.3.1	Actual heel angle and roll amplitude	3
4.3.2	Roll period	3
4.3.3	Roll peak hold value	3
4.4	Display	4
4.5	Alerts	4
4.5.1	Operational alerts	5
4.5.2	Functional alerts	5
4.6	Interface	6
4.7	Power supply	6
5	Accuracy	6
5.1	Actual heel angle, roll amplitude and roll period	6
5.2	Acceleration condition	6
6	Test methods and required results	6
6.1	General	6
6.2	Static actual heel angle test	7
6.2.1	Method of testing and required results	7
6.3	Dynamic actual heel angle test	7
6.3.1	Method of testing and required results	7
6.4	Long-term actual heel angle test	7
6.4.1	Method of testing and required results	7
6.5	Roll period test	8
6.5.1	Method of testing and required results	8
6.6	Connections to other equipment test	8
6.6.1	Method of testing and required results	8
6.7	Display test	8
6.7.1	Method of testing and required results	8
6.8	Operational alert test	10
6.8.1	Method of testing and required results	10
6.9	Functional alert test	11
6.9.1	Method of testing and required results	11
6.10	Roll peak hold value test	11
6.10.1	Method of testing and required results	11
6.11	Reset function of roll peak hold value test	11
6.11.1	Method of testing and required results	12
6.12	Power supply test	12

7	Installation position	12
8	Information	12
	Annex A (informative) Relationship between transverse metacentric stability and measured natural roll period of ships in waves	13
	Annex B (informative) Test facility type test methodology	16
	Annex C (informative) IEC 611621 interface for VDR and other systems	17
	Bibliography	19
