## Ships and marine technology - Measurement of changes in hull and propeller performance - Part 1: General principles

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....  | 1           |
| 3                     | Terms and definitions .....   | 1           |
| 4                     | General principles .....  | 2           |
| 4.1                   | Hull and propeller performance .....  | 2           |
| 4.2                   | Ship propulsion efficiency and total resistance .....   | 3           |
| 4.3                   | Primary parameters when measuring changes in hull and propeller performance .....   | 4           |
| 4.4                   | Secondary parameters .....  | 5           |
| 4.5                   | Measurement procedures .....  | 5           |
| 4.5.1                 | General .....   | 5           |
| 4.5.2                 | Data acquisition .....  | 6           |
| 4.5.3                 | Data storage .....  | 6           |
| 4.5.4                 | Data preparation .....  | 6           |
| 5                     | Performance indicators .....  | 6           |
| 5.1                   | Dry-docking performance: Change in hull and propeller performance following present out-docking as compared with the average from previous out-dockings .....   | 7           |
| 5.2                   | In-service performance: The average change in hull and propeller performance over the period following out-docking to the end of the dry-docking interval ..... | 8           |
| 5.3                   | Maintenance trigger: Change in hull and propeller performance from the start of the dry-docking interval to a moving average at any chosen time .....           | 9           |
| 5.4                   | Maintenance effect: Change in hull and propeller performance measured before and after a maintenance event .....  | 10          |
| 6                     | Measurement uncertainties and the accuracy of the performance indicators .....  | 11          |
| Annex A (informative) | Method and assumptions for estimating the uncertainty of a performance analyses process .....   | 13          |
| Bibliography .....    |   | 30          |
