## Ships and marine technology - Safety valve for cargo tanks of LNG carriers - Design and testing requirements

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Main valve components .....	2
4.1	Body .....	2
4.2	Nozzle .....	2
4.3	Disk .....	2
4.4	Cover .....	2
4.5	Diaphragm .....	2
5	Design .....	3
6	Materials .....	4
7	Production testing and inspection .....	4
7.1	Purpose .....	4
7.2	Impact test .....	4
7.3	Non-destructive inspection .....	4
7.4	Pressure test .....	5
7.4.1	General requirement .....	5
7.4.2	Fluid .....	5
7.4.3	Duration .....	5
7.4.4	Test equipment .....	5
7.5	Surface inspection .....	5
7.6	Visual inspection .....	5
8	Performance test .....	6
8.1	Performance test in ambient temperature .....	6
8.1.1	Purpose .....	6
8.1.2	Number of test times .....	6
8.1.3	Fluid .....	6
8.1.4	Acceptance criteria .....	6
8.2	Leakage test in ambient temperature .....	6
8.2.1	Purpose .....	6
8.2.2	Fluid .....	6
8.2.3	Test pressure .....	6
8.2.4	Duration .....	6
8.2.5	Acceptance leakage rate .....	6
8.2.6	Test equipment .....	7
8.3	Performance test in low temperature .....	7
8.3.1	Purpose .....	7
8.3.2	Number of test times .....	7
8.3.3	Fluid .....	7
8.3.4	Acceptance criteria .....	7
8.4	Preparation for the performance test in low temperature .....	7
8.4.1	Start temperature for the test .....	7

8.4.2	Safety requirement .....	7
8.4.3	Test system .....	7
8.5	Leakage test in low temperature .....	8
8.5.1	Purpose .....	8
8.5.2	Fluid .....	8
8.5.3	Test pressure .....	8
8.5.4	Duration .....	8
8.5.5	Acceptance tolerance .....	9
8.5.6	Test equipment .....	9
9	Vacuum test .....	9
9.1	Purpose .....	9
9.2	Vacuum condition .....	9
9.2.1	Test temperature .....	9
9.2.2	Vacuum set test .....	9
9.2.3	Number of test times .....	9
9.2.4	Fluid .....	9
10	Type test .....	9
11	Determination of pilot operated safety valve performance .....	9
12	Sizing of pilot operated safety valves .....	10
13	Marking and sealing .....	10
	Bibliography .....	11
