

DIN EN ISO 12215-9:2019-02 (E)

Small craft - Hull construction and scantlings - Part 9: Sailing craft appendages (ISO 12215-9:2012)

Contents		Page
Foreword		5
Introduction		6
1	Scope	7
2	Normative references	7
3	Terms and definitions	8
4	Symbols	9
5	Design stresses	10
6	Structural components to be assessed	12
7	Load cases	12
7.1	General	12
7.2	Load case 1 -- Fixed keel at 90° knockdown	13
7.3	Load case 2 -- Canted keel steady load at 30° heel with dynamic overload factor	14
7.4	Load case 3 -- Keelboat vertical pounding	15
7.5	Load case 4 -- Keelboat longitudinal impact	16
7.6	Load case 5 -- Centreboard on capsize recoverable dinghies	17
7.7	Load case 6 -- Centreboard or dagger board upwind	17
7.8	Other load cases	18
8	Computational methods	21
8.1	General	21
8.2	General guidance for assessment by 3D numerical procedures	21
8.3	Assessment by strength of materials/non-computational-based methods	22
9	Compliance	22
Annex A (normative) Application declaration		24
Annex B (informative) Information on metal for appendages and fasteners and "established practice" for fastening and welding		25
Annex C (informative) "Established practice" structural arrangement for ballast keels		36
Annex D (informative) "Established practice" calculation of keel fin strength (fixed or canting) and fixed ballast keel connected by bolts		50
Annex E (informative) Geometrical properties of some typical appendage foil shapes		67
Annex F (informative) Simplified fatigue strength assessment		70
Bibliography		82
