

# DIN EN ISO 12215-9:2019-02 (E)

## Small craft - Hull construction and scantlings - Part 9: Sailing craft appendages (ISO 12215-9:2012)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		5
Introduction .....		6
1	Scope .....	7
2	Normative references .....	7
3	Terms and definitions .....	8
4	Symbols .....	9
5	Design stresses .....	10
6	Structural components to be assessed .....	12
7	Load cases .....	12
7.1	General .....	12
7.2	Load case 1 -- Fixed keel at 90° knockdown .....	13
7.3	Load case 2 -- Canted keel steady load at 30° heel with dynamic overload factor .....	14
7.4	Load case 3 -- Keelboat vertical pounding .....	15
7.5	Load case 4 -- Keelboat longitudinal impact .....	16
7.6	Load case 5 -- Centreboard on capsize recoverable dinghies .....	17
7.7	Load case 6 -- Centreboard or dagger board upwind .....	17
7.8	Other load cases .....	18
8	Computational methods .....	21
8.1	General .....	21
8.2	General guidance for assessment by 3D numerical procedures .....	21
8.3	Assessment by strength of materials/non-computational-based methods .....	22
9	Compliance .....	22
Annex A (normative) Application declaration .....		24
Annex B (informative) Information on metal for appendages and fasteners and "established practice" for fastening and welding .....		25
Annex C (informative) "Established practice" structural arrangement for ballast keels .....		36
Annex D (informative) "Established practice" calculation of keel fin strength (fixed or canting) and fixed ballast keel connected by bolts .....		50
Annex E (informative) Geometrical properties of some typical appendage foil shapes .....		67
Annex F (informative) Simplified fatigue strength assessment .....		70
Bibliography .....		82
