|--------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-------------|
| Foreword | | 5 |
| Introduction | | 6 |
| 1 | Scope | 7 |
| 2 | Normative references | 7 |
| 3 | Terms and definitions | 8 |
| 4 | Symbols | 9 |
| 5 | Design stresses | 10 |
| 6 | Structural components to be assessed | 12 |
| 7 | Load cases | 12 |
| 7.1 | General | 12 |
| 7.2 | Load case 1 -- Fixed keel at 90° knockdown | 13 |
| 7.3 | Load case 2 -- Canted keel steady load at 30° heel with dynamic overload factor | 14 |
| 7.4 | Load case 3 -- Keelboat vertical pounding | 15 |
| 7.5 | Load case 4 -- Keelboat longitudinal impact | 16 |
| 7.6 | Load case 5 -- Centreboard on capsize recoverable dinghies | 17 |
| 7.7 | Load case 6 -- Centreboard or dagger board upwind | 17 |
| 7.8 | Other load cases | 18 |
| 8 | Computational methods | 21 |
| 8.1 | General | 21 |
| 8.2 | General guidance for assessment by 3D numerical procedures | 21 |
| 8.3 | Assessment by strength of materials/non-computational-based methods | 22 |
| 9 | Compliance | 22 |
| Annex A (normative) Application declaration | | 24 |
| Annex B (informative) Information on metal for appendages and fasteners and "established practice" for fastening and welding | | 25 |
| Annex C (informative) "Established practice" structural arrangement for ballast keels | | 36 |
| Annex D (informative) "Established practice" calculation of keel fin strength (fixed or canting) and fixed ballast keel connected by bolts | | 50 |
| Annex E (informative) Geometrical properties of some typical appendage foil shapes | | 67 |
| Annex F (informative) Simplified fatigue strength assessment | | 70 |
| Bibliography | | 82 |
