## Ships and marine technology - Guidelines for the design and manufacture of the hub cap with fins for a fixed-pitch marine propeller

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | iv          |
| Introduction ..... |  | v           |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....   | 1           |
| 3                  | Terms and definitions .....  | 1           |
| 4                  | Guidelines for HCWF design and manufacture .....                           | 2           |
| 4.1                | Hydrodynamic performance and energy-saving effect evaluation .....         | 2           |
| 4.2                | Manufacture .....  | 2           |
| 4.3                | Tightness test .....   | 3           |
| 4.4                | Accessibility .....  | 3           |
| 5                  | Hydrodynamic design procedure of HCWF .....                                | 3           |
| 5.1                | Applicability analysis .....   | 3           |
| 5.2                | Preliminary principle dimensions and main parameters .....                 | 3           |
| 5.3                | Pitch and camber distribution .....  | 3           |
| 5.4                | Verification with open water testing .....                                 | 3           |
| 5.5                | Verification using full-scale tests .....                                  | 5           |
| 6                  | Strength check of HCWF .....   | 5           |
| 6.1                | Strength check method of HCWF .....  | 5           |
| 6.2                | Strength check method of connecting bolts between HCWF and propeller ..... | 6           |
| Bibliography ..... |  | 7           |
