Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Determination of the measurement procedure 3

5 Preparation for the test 4
5.1 Confirmation of effective chlorine concentration 4
5.2 Preparation for chlorine standard solution 4
5.3 Verification of standard solution 4
5.4 Interferences 5
5.4.1 General 5
5.4.2 Salinity 5
5.4.3 Manganese compounds 5
5.4.4 Colour and turbidity 5
5.4.5 Dissolved oxygen 5
5.4.6 Temperature 5
5.5 Procedures for determining the impact on interferences 5
5.5.1 General 5
5.5.2 Salinity 6
5.5.3 Temperature 6
5.5.4 Turbidity (optional) 6
5.6 Test equipment and apparatus 7

6 Pre-test(checklistandmethod/specifications) 7
6.1 General 7
6.2 Abnormal water level test 7
6.3 Sample temperature test 8

7 Test procedures 8
7.1 Main test 8
7.1.1 General 8
7.1.2 Linearity test 8
7.1.3 Zero drift test 9
7.1.4 MDL (method detection limit) test 10
7.1.5 Span drift and repeatability test 11
7.1.6 Response time test 12
7.1.7 Total performance test 12
7.1.8 Reagent validity test 13
7.2 TRO sensor unit environmental test 14
7.2.1 General 14
7.2.2 Testing items 14
7.2.3 IP test 14
7.2.4 Explosion test 14
7.3 Test report 14

Annex A (normative) The test bench facilities 16

Annex B (normative) Information to be supplied by manufacturer 18

Annex C (normative) Chlorine concentration test sheet 19
