

ISO 16425:2024-01 (E)

Ships and marine technology - Specifications for the installation of ship communication networks for shipboard equipment and systems

Contents		Page
Foreword	vi
Introduction	viii
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Abbreviated terms	6
5 Network system architecture	7
5.1 Scope of networks system architecture	7
5.2 Controlled network requirements	9
5.3 Network system design	9
5.3.1 General	9
5.3.2 Network system separation	10
5.3.3 Network division	10
5.3.4 Traffic division	10
5.3.5 Redundancy	11
5.3.6 Cyber security	11
5.4 Roles and management	11
5.4.1 General	11
5.4.2 Ship owner	11
5.4.3 System integrator	11
5.4.4 Ship operator	11
5.4.5 Manufacturer	12
5.4.6 After-sales-service provider	12
6 Organized necessary function	12
6.1 General	12
6.2 Necessary information	12
7 Operation plan design	13
7.1 General	13
7.2 Objectives for managing shipboard network operations	13
7.3 Items to manage	15
7.3.1 Items to manage devices and cables to be installed	15
7.3.2 Items to monitor and details	15
7.3.3 Details of maintenance	15
7.3.4 Back-ups and log management	15
7.3.5 Operation of reports	15
7.3.6 Service management	16
8 Understanding the equipment to be installed	16
8.1 Understanding the equipment	16
8.1.1 General	16
8.1.2 Inventory lists	16
8.2 Requirements for the 16425-Network device and 16425-equipment installed in the shipboard network	16
8.2.1 General cyber security requirements for 16425-Network devices and 16425-equipment	16
8.2.2 Network interface for 16425-Network equipment and 16425-Network device	17
8.2.3 Requirements for 16425-Network nodes	17
8.2.4 Requirements for 16425-Network devices	18

8.3	Protocol and traffic	23
8.3.1	General	23
8.3.2	Protocol	23
8.3.3	Traffic	23
8.3.4	IP address	23
8.3.5	MAC address	23
8.4	Cable	23
8.4.1	General	23
8.4.2	Cable specification	23
8.4.3	Cable earth method	23
9	Network design	24
9.1	General	24
9.2	Concept of shipboard network system	24
9.2.1	General arrangement	24
9.2.2	Channel	24
9.2.3	Permanent ink	24
9.2.4	Code	25
9.2.5	Extender connector	25
9.2.6	Telecommunications outlet	25
9.3	Design standard	25
9.3.1	Category of cables and codes	25
9.3.2	Plug connection method	25
9.3.3	Specifications for naming cable	25
9.3.4	Model number of cable, code, plug, jack and crimping tools to be used	25
9.4	Physical design	25
9.4.1	Selection of 16425-Network equipment	25
9.4.2	Cabling	27
9.4.3	Separation of collision domain	28
9.4.4	Setting of interfaces	28
9.4.5	Installation	28
9.5	Logical design	28
9.5.1	General	28
9.5.2	Isolation of network	28
9.5.3	Broadcast domain	29
9.6	Reliability design	29
9.6.1	General	29
9.6.2	Redundancy	29
9.6.3	Monitoring of shipboard networks	29
9.6.4	Load design	30
9.7	Wireless network design	30
9.7.1	General	30
9.7.2	Frequency requirement	30
9.7.3	Frequency interference	30
9.7.4	Load design	31
9.7.5	Installation design	31
9.7.6	Wireless network security design	31
9.7.7	Power supply and voltage	31
9.7.8	Pre-survey	31
9.7.9	Security design	32
9.8	Documentation	32
9.8.1	Network design document	32
9.8.2	List of equipment (device inventory)	32
9.8.3	Schematic diagram	32
9.8.4	Logical topology diagram	33
9.8.5	List of virtual networks	33
9.8.6	List of interfaces between (virtual) networks	33
9.9	Risk assessment (design phase)	33
10	16425-Network device and cable installation	33
10.1	General	33
10.2	Installation procedure	34
10.2.1	16425-Network device	34
10.2.2	Network cable	34
10.2.3	Cable end termination	36

10.3	Installation confirmation.....	37
10.3.1	Conductivity confirmation.....	37
10.3.2	Wire map confirmation.....	37
10.3.3	Length confirmation.....	37
10.3.4	Insertion loss test.....	37
10.3.5	Near end crosstalk loss.....	37
10.3.6	Power meter checking.....	38
10.3.7	Cable ID.....	38
10.3.8	End termination.....	38
10.4	16425-Wireless-Gateway installation procedures.....	38
10.4.1	Environmental resistance.....	38
11	Network cable installation and wireless installation test and inspection.....	38
11.1	Cable installation.....	38
11.2	16425-Wireless Gateway installation confirmation.....	44
12	Network operation.....	45
12.1	General.....	45
12.2	Identify vulnerabilities.....	45
12.2.1	Operation policy and procedure.....	45
12.2.2	Inventory and assessment.....	45
12.3	Develop protection and detection measures.....	46
12.3.1	Policy and procedure.....	46
12.3.2	Access control.....	46
12.4	Response and recovery.....	46
12.4.1	Contingency plan.....	46
12.4.2	Response to shipboard network incidents.....	46
12.4.3	Recovery from shipboard network incidents.....	46
12.5	Maintenance.....	47
12.5.1	Maintenance policy and procedure.....	47
12.5.2	Maintenance document and report.....	47
13	Network cyber security.....	47
13.1	Network cyber security requirements.....	47
13.1.1	General.....	47
13.1.2	Cyber security management system.....	47
13.1.3	Operation plan design.....	48
13.1.4	16425-Network equipment access security.....	49
13.1.5	Wireless network access authentication method.....	50
13.1.6	Network design.....	51
	Annex A (informative) Implementing the content provided in this document.....	56
	Annex B (informative) 16425-Network nodes and network monitoring specifications.....	77
	Annex C (informative) 16425-Network implementation example.....	81
	Bibliography.....	83
