DIN EN ISO 15085:2024-12 (E)

Small craft - Protection from falling overboard and means of reboarding (ISO 15085:2024)

Contents

Page

European foreword ... **4**

Annex ZA (informative) **Relationship between this European Standard and the essential requirements of Directive 2013/53/EU aimed to be covered** ... **5**

Foreword ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **7**

4 General requirements ... **10**
4.1 Prevention from falling overboard ... 10
4.2 Deck zones ... 10
4.3 Required safety devices ... 11
4.4 General requirements for deck zones ... 13
4.4.1 All deck zones ... 13
4.4.2 Deck zones Z1 and Z2 ... 13
4.5 Requirements for operation and storage temperature of safety devices ... 14
4.5.1 Operation temperature ... 14
4.5.2 Storage temperature ... 14

5 Slip-resistant surfaces ... **14**
5.1 General ... 14
5.2 Requirements for trampolines and nets ... 14

6 Foot-stops ... **14**
6.1 General ... 14
6.2 Foot-stops requirements ... 14
6.3 Minimum foot-stops height and angle ... 15
6.4 Foot-stops made of angled surfaces ... 16
6.5 Maximum clearance between deck and foot-stop ... 16
6.6 Continuity on the deck zone level in vicinity of foot-stop ... 16
6.7 Gaps in the foot-stop rail ... 16

7 Handholds ... **16**
7.1 General ... 16
7.2 Location in vicinity of outer deck edge ... 16
7.3 Strength ... 17

8 Barriers to falling overboard ... **17**
8.1 General ... 17
8.2 Geometric requirements for barriers to falling overboard ... 17
8.2.1 Height of barriers to falling overboard ... 17
8.2.2 Openings in barriers to falling overboard ... 18
8.3 Additional requirements for sailing boats ... 19
8.3.1 Bow pulpits for sailing boats ... 19
8.3.2 Transom barriers to falling overboard for sailing boats ... 19
8.3.3 Forward cross beams of sailing catamarans ... 20
8.3.4 Central hull of sailing trimarans ... 20
8.4 Risk of falling overboard from elevated deck zones ... 20
8.5 Barrier to falling overboard design and strength requirements ... 22

8.5.1 General requirements 22
8.5.2 Requirements for guard-rails or low guard-rails 22
8.5.3 Requirements for guard-lines 22
8.5.4 Requirements for stanchions or guard-line supports 23

9 Hooking points 23
9.1 General 23
9.2 Location 23
9.3 Location for habitable multihull craft susceptible to inversion 24
9.4 Size 24
9.5 Strength 24

10 Attachment points for jack-lines 24
10.1 General 24
10.2 Fitting 24
10.3 Strength 24

11 Prevention of falling overboard from high-speed craft 25
11.1 General 25
11.2 Additional requirements for handholds 25
11.3 Body support 26
11.4 Seat fixing strength 26

12 Toe straps for sailing dinghies 26

13 Means of reboarding 26
13.1 General requirements 26
13.2 Requirements for rigid ladder 27
13.3 Requirements for non-rigid ladder 29
13.4 Reboarding test 30

14 Owner's manual 30

Annex A (normative) **Test of seats for high-speed craft 31**
