

ISO 18943:2014-12 (E)

Imaging materials - Magnetic hard drives used for image storage - Care and handling

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Terms and definitions	1
3	HDD components	4
3.1	Disks	4
3.2	Motor and spindle	4
3.3	Read/Write head	4
3.4	Servo head	4
3.5	Control electronics	4
3.6	Interconnections	4
4	Possible physical configurations	5
4.1	Disk arrays	5
4.2	Single HDD	5
5	Access and usage options	5
5.1	Online HDDs (connected and powered)	5
5.2	Online but inactive HDDs (connected, not spinning)	5
5.3	Off-line (not connected, not spinning)	5
6	Reliability	5
7	Data quality	6
8	Interoperability/Compatibility	6
9	Migration	6
10	Environmental factors	6
10.1	Temperature and humidity	6
10.2	Condensation	7
10.3	Acclimatisation	7
10.4	Magnetic fields	7
11	Possible failure mechanisms	7
11.1	Physical shock	7
11.2	Plugging/unplugging connectors	7
11.3	Head-to-disk stiction	8
11.4	Heat	8
11.5	Humidity	8
11.6	Air quality and particulates	8
11.7	Magnetic degradation	8
11.8	Run time	8
11.9	Shelf life	8
12	Obsolescence issues	8
12.1	Software	8

12.2	Hardware	9
13	Transportation and shipping	9
13.1	Freighting	9
13.2	Shipping containers	9
13.3	Time out of storage	9
14	Disaster	9
14.1	Initial handling following a disaster	9
14.2	Fire	9
14.3	Earthquakes	10
14.4	Heat and temperature extremes	10
14.5	Smoke, soot, and contamination	10
14.6	Water and moisture	10
15	Staff training	10
15.1	Purpose	10
15.2	Training paths	10
15.3	Schedule for training	10
15.4	Update of training	11
15.5	Content of training	11
16	Minimum handling requirements checklist	11
	Annex A (normative) RAID and MAID levels	12
	Annex B (informative) Websites and general information	13
	Bibliography	14
