

ISO 17850:2015-07 (E)

Photography - Digital cameras - Geometric distortion (GD) measurements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Measurement methods	2
4.1	General	2
4.2	Local geometric distortion	3
4.3	Line geometric distortion	3
5	Requirements	4
5.1	Apparatus and hardware	4
5.2	Lighting	4
5.3	Dot chart	5
5.3.1	Design and characteristics	5
5.3.2	Requirement for the chart planarity	6
5.4	Grid chart	7
5.4.1	Design and characteristics	7
5.5	Image/camera settings	8
5.5.1	General	8
5.5.2	Basic settings and influencing factors	8
5.5.3	Specific test procedures	8
5.5.4	Positioning of the camera	8
5.5.5	Exposure, white balance, and focus	9
6	Determination of geometric distortion	10
6.1	Local geometric distortion	10
6.1.1	Numerical definition	10
6.1.2	Outline of the practical algorithm	10
6.2	Line geometric distortion	11
6.2.1	Horizontal line distortion	11
6.2.2	Vertical line distortion	12
6.2.3	Total line distortion	12
7	Presentation of results	13
7.1	General	13
7.2	Local geometric distortion	13
7.3	Line geometric distortion	14
Annex A (informative)	Illustrative example and validation	15
Annex B (informative)	Extracting the dots from the target	17
Annex C (informative)	Dot centre validation	25
Annex D (informative)	Grid sort	30

Annex E (informative) Example of subjective evaluation	40
Bibliography	48
