## Graphic technology and photography - Colour characterization of digital still cameras (DSCs) - Part 4: Programmable light emission system

---

| Contents   | Page |
|--|------|
| Foreword .....   | iv   |
| Introduction .....   | v    |
| 1 Scope .....  | 1    |
| 2 Normative references .....   | 1    |
| 3 Terms and definitions .....  | 1    |
| 4 Requirements .....   | 2    |
| 4.1 General .....  | 2    |
| 4.2 Hardware requirements .....  | 3    |
| 4.2.1 General .....  | 3    |
| 4.2.2 Operating condition .....  | 4    |
| 4.2.3 Specifications of the system .....   | 4    |
| 4.2.4 Time stability and long-term stability of light intensity .....  | 7    |
| 4.3 Figure of merit for a colour target using a programmable light emission system .....   | 9    |
| 4.3.1 General .....  | 9    |
| 4.3.2 Terms and notations of SR2 .....   | 9    |
| 4.3.3 Method for the calculation of SR2 .....  | 10   |
| 4.3.4 Figure of merit .....  | 11   |
| 4.4 Report .....   | 11   |
| Annex A (informative) Integrating sphere method and LED-driving method .....   | 13   |
| Annex B (informative) Spectral power distribution optimization procedure for multiple LEDs .....   | 15   |
| Annex C (informative) The need for constraints on the average values and maximum values of SR2 and CIEDE2000 .....                                     | 19   |
| Annex D (informative) Evaluation method for light source generated by a programmable light emission system .....                                       | 21   |
| Annex E (informative) SR2 and CIEDE2000 recommendations for colorimetric image capture .....   | 24   |
| Annex F (normative) SR2L and SR2 calculation methods for a light emission system in which spectral distribution is only obtained by measurements ..... | 26   |
| Bibliography .....   | 28   |
