## Imaging materials - Photographic reflection prints - Methods for measuring indoor light stability

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Requirements and limitations .....	1
5	Test methods -- General .....	2
5.1	Safety cautions .....	2
5.2	Light source and filters .....	2
5.3	Humidity control .....	2
5.4	Temperature control .....	2
5.5	Air quality in the test environment .....	2
5.6	Duration of exposures .....	3
6	Light source conditions .....	3
6.1	Light source measurements .....	3
6.2	Light exposure equipment .....	4
6.3	Specifications for optical filters .....	4
6.3.1	General .....	4
6.3.2	Filter specifications for simulating general indoor display conditions .....	4
6.3.3	Filter specifications for simulating in-window display conditions .....	4
6.3.4	Use of an IR-reducing filter .....	4
6.3.5	Filter configuration .....	4
6.4	Verification of chamber fade uniformity .....	4
7	Light source specifications .....	5
7.1	Simulated general indoor display .....	5
7.1.1	Application .....	5
7.1.2	Filtered xenon-arc configuration to simulate general indoor display conditions .....	5
7.1.3	Spectral irradiance .....	5
7.1.4	Radiation intensity, temperature, and humidity .....	6
7.2	Simulated in-window display .....	6
7.2.1	Application .....	6
7.2.2	Filtered xenon-arc configuration to simulate in-window display conditions .....	7
7.2.3	Spectral irradiance .....	7
7.2.4	Radiation intensity, temperature and humidity .....	7
8	Specimen preparation .....	8
8.1	Specimens .....	8
8.1.1	Use of replicates and reference specimens .....	8
8.1.2	Setting of dummy specimens for the open space .....	8
8.1.3	Test target design and format .....	9
8.2	Conditioning the prints after printing .....	9
9	Test report .....	9

<b>9.1</b>	<b>General reporting requirements .....</b>	<b>9</b>
	<b>Annex A (informative) Evaluation of light stability reciprocity behaviour .....</b>	<b>11</b>
	<b>Annex B (informative) Relative spectral transmittance of filters .....</b>	<b>13</b>
	<b>Annex C (informative) Example of chamber uniformity verification method .....</b>	<b>15</b>
	<b>Annex D (informative) Sample temperature measurements based on different parameters .....</b>	<b>17</b>
	<b>Bibliography .....</b>	<b>20</b>
