

# DIN ISO 230-2:2011-11 (E)

## Test code for machine tools - Part 2: Determination of accuracy and repeatability of positioning numerically controlled axes (ISO 230-2:2006)

---

<b>Contents</b>		<b>Page</b>
National foreword .....		3
Introduction .....		5
1	Scope .....	6
2	Terms and definitions .....	6
3	Test conditions .....	10
3.1	Environment .....	10
3.2	Machine to be tested .....	11
3.3	Warm-up .....	11
4	Test programme .....	11
4.1	Mode of operation .....	11
4.2	Selection of target position .....	11
4.3	Measurements .....	12
4.3.1	Set-up and instrumentation .....	12
4.3.2	Tests for linear axes up to 2 000mm .....	12
4.3.3	Tests for linear axes exceeding 2 000 mm .....	13
4.3.4	Tests for rotary axes up to 360° .....	13
4.3.5	Tests for rotary axes exceeding 360 .....	13
5	Evaluation of the results .....	13
5.1	Linear axes up to 2 000 mm and rotary axes up to 360 .....	13
5.2	Linear axes exceeding 2 000 mm and rotary axes exceeding 360 .....	14
6	Points to be agreed between supplier/manufacturer and user .....	14
7	Presentation of results .....	14
7.1	Method of presentation .....	14
7.2	Parameters .....	15
7.2.1	General .....	15
7.2.2	Tests for linear axes up to 2 000 mm and rotary axes up to 360 .....	16
7.2.3	Tests for linear axes exceeding 2 000 mm and rotary axes exceeding 360 .....	16
Anhang A (informative) Measurement uncertainty estimation for linear positioning measurement -- Simplified method .....		20
A.1	Estimation of the measurement uncertainty .....	20
A.2	Contributors to the measurement uncertainty .....	20
A.2.1	General .....	20
A.2.2	Uncertainty due to the measuring device, UDEVICE .....	20
A.2.3	Uncertainty due to misalignment of measuring device to machine axis under test, UMISALIGNMENT .....	21
A.2.4	Uncertainty due to the compensation of the machine tool temperature .....	22
A.2.5	Uncertainty due to environmental variation error (EVE, or thermal drift), UEVE .....	26
A.2.6	Correction of repeatability values due to environmental variation errors .....	26
A.3	Estimation of uncertainty of parameters A, A, A, E, E, E, R, R, R, B .....	27
A.3.1	General .....	27
A.3.2	Uncertainty estimation for unidirectional repeatability, U(R, R) .....	28

A.3.3	Uncertainty estimation for reversal value, U(B)	28
A.3.4	Uncertainty of bi-directional repeatability, U(R)	28
A.3.5	Uncertainty of the systematic deviations, U(M, E, E, E)	28
A.3.6	Uncertainty of accuracy of positioning, U(A, A, A)	29
A.4	Examples of uncertainty estimation	29
Annex B (informative) Step cycle		36
