

ISO 23218-1:2022-06 (E)

Industrial automation systems and integration - Numerical control systems for machine tools - Part 1: Requirements for numerical control systems

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Abbreviated terms	4
5	Technical requirements	5
5.1	NC system functional requirements	5
5.1.1	Coordinate system and motion direction	5
5.1.2	Programming languages	5
5.1.3	Control function of the NC system	5
5.2	Interface signals of NC systems	5
5.2.1	Analogue interface signal	5
5.2.2	Digital interface signal	5
5.2.3	Fieldbus interface	6
5.3	Environmental requirements of NC systems	6
5.3.1	General	6
5.3.2	Temperature, humidity and atmospheric pressure environmental adaptability requirements	6
5.3.3	Mechanical environment adaptability	6
5.4	EMC immunity requirements of NC systems	7
5.4.1	EMC basic requirements for NC systems	7
5.4.2	Criteria of EMC immunity	7
5.4.3	EMC basic immunity performance requirements for NC systems	7
5.5	Protection and safety requirements of NC systems	9
5.6	Document requirements for NC system	9
5.6.1	Technical documentation	9
5.6.2	Guarantee file	9
5.6.3	Packaging documentation	9
5.6.4	Nameplate	9
6	Test method	10
6.1	Test conditions of NC systems	10
6.2	Function test of NC systems	10
6.3	Inspection for basic design requirements of NC systems	10
6.4	Environmental test of NC systems	10
6.4.1	Temperature and humidity adaptability test	10
6.4.2	Mechanical environmental adaptability test	11
6.4.3	Power environment adaptability test	12
6.5	EMC immunity test of NC systems	12
6.5.1	Electrostatic discharge (ESD) immunity test	12
6.5.2	Electrical fast transient/burst immunity test	13
6.5.3	Surge immunity test	14
6.5.4	Voltage dip and short interruption immunity test	14
6.5.5	Radio-frequency radiated immunity test	15

6.5.6	Radio-frequency field conduction immunity test	16
6.5.7	Power frequency magnetic field immunity test	16
6.6	Packing inspection	17
6.7	Integrity check for the accompanying product documents	17
6.8	Sequence of inspection and test	17
7	Inspection rules	17
7.1	General	17
7.2	Classification of inspection	17
7.3	Type inspection	18
7.4	Routine inspection	18
7.5	Special inspection	18
8	Packaging, storage and transportation	19
8.1	Packaging	19
8.2	Storage	19
8.3	Transportation	19
Annex A (normative) Product quality determination rules and inspection items		20
Bibliography		21
