

# ISO 230-12:2022-06 (E)

## Test code for machine tools - Part 12: Accuracy of finished test pieces

---

Contents	Page
<b>Foreword</b>	v
<b>Introduction</b>	vi
<b>1 Scope</b>	1
<b>2 Normative references</b>	1
<b>3 Terms and definitions</b>	1
<b>4 Preliminary remarks</b>	2
4.1 Measuring units	2
4.2 Reference to ISO 230-1	2
4.3 Machining conditions	2
4.4 Tests to be performed	2
4.5 Measuring instruments	3
4.6 Location of test pieces	3
4.7 Fixing of test pieces	3
4.8 Material of test pieces, tooling and cutting parameters	3
4.9 Rough cuts	3
4.10 Diagrams	3
4.11 Information to be recorded	4
4.12 Software compensation	4
<b>5 Machining tests to evaluate the geometric accuracy of a single surface</b>	4
5.1 General	4
5.2 Machining of a cylindrical surface	4
5.2.1 Machining of rotating disc	4
5.2.2 Machining of rotating cylinder with a feed in the axial direction	6
5.2.3 Machining of a cylindrical surface by circular contouring	11
5.3 Machining tests of a flat surface	13
5.3.1 Facing of a rotating test piece	13
5.3.2 Machining of a flat surface with non-rotating test piece	15
5.3.3 Face machining of multiple surfaces	17
5.3.4 Flank machining with one linear axis	19
5.3.5 Flank machining with two linear axes	20
5.4 Machining of a rotating spherical surface	22
5.4.1 Object	22
5.4.2 Test procedure	22
5.4.3 Geometric features to be measured	23
5.4.4 Measuring instruments	23
5.4.5 Possible contributors to machining error	23
5.4.6 Machines to be tested	23
5.4.7 Information to be reported	23
5.5 Flank milling of a cone frustum with five-axis interpolation	24
5.5.1 Object	24
5.5.2 Test procedure	24
5.5.3 Geometric features to be measured	25
5.5.4 Measuring instruments	25
5.5.5 Possible contributors to machining error	26
5.5.6 Machines to be tested	26
5.6 Flank milling of a truncated square pyramid with five-axis interpolation	26
5.6.1 Object	26
5.6.2 Test procedure	26

5.6.3	Geometric features to be measured.....	27
5.6.4	Measuring instruments.....	27
5.6.5	Possible contributors to machining error.....	27
5.6.6	Machines to be tested .....	27
<b>6</b>	<b>Machining tests to evaluate geometric relationship of multiple machining features .....</b>	<b>27</b>
6.1	General.....	27
6.2	Machining of internal and external cylindrical surfaces.....	28
6.2.1	Object.....	28
6.2.2	Test procedure.....	28
6.2.3	Geometric features to be measured.....	29
6.2.4	Measuring instruments.....	29
6.2.5	Possible contributors to machining error.....	29
6.2.6	Machines to be tested .....	29
6.2.7	Information to be reported.....	30
6.3	Machining of holes at multiple positions over the test piece.....	30
6.3.1	Object.....	30
6.3.2	Test procedure.....	30
6.3.3	Geometric features to be measured.....	31
6.3.4	Measuring instrument.....	31
6.3.5	Possible contributors to machining error.....	31
6.3.6	Machines to be tested .....	31
6.4	Machining multiple surfaces with linear motion.....	31
6.4.1	Flank machining of two faces perpendicular to each other .....	31
6.4.2	Flank machining of faces inclined with respect to the reference surface.....	33
6.5	Multiple features machined with angular indexing of test piece.....	36
6.5.1	Boring of a cylindrical surface with angular indexing of test piece by 180°.....	36
6.5.2	Machining bores with angular indexing of test piece.....	38
6.5.3	Machining rectangular test piece using single linear axis combined with angular indexing of rotary axis parallel to the tool axis .....	40
6.5.4	Machining rectangular test piece using single linear axis combined with angular indexing of rotary axis perpendicular to the tool axis .....	41
<b>7</b>	<b>Special machining tests .....</b>	<b>45</b>
7.1	General.....	45
7.2	Machining tests for evaluation of short-term capability.....	45
7.3	Machining tests for evaluation of thermal influence .....	45
<b>8</b>	<b>Measurement uncertainty .....</b>	<b>45</b>
<b>Bibliography .....</b>		<b>46</b>
