## Industrial automation systems - Numerical control of machines - NC processor output; File structure and language format

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Co-ordinate system .....	1
4	General structure of CLDATA .....	1
5	CLDATA file structure .....	3
5.1	General comments .....	3
5.2	Letters .....	4
5.3	Digits .....	5
5.4	Special characters .....	6
5.5	Characters .....	7
5.6	Symbol for literal delimiter .....	8
5.7	Literal character strings .....	9
5.8	Symbol for unary operator .....	10
5.9	Integer numbers .....	11
5.10	Real numbers .....	12
5.11	Keywords .....	13
5.12	Symbol for element separator .....	14
5.13	Elements .....	15
5.14	Symbol for record separator .....	16
5.15	Records .....	17
5.16	Symbol for file separator .....	18
5.17	File .....	19
6	Record structure .....	20
6.1	General comments .....	20
6.2	Original program sequence identification .....	21
6.3	Integer code type post processor command .....	22
6.4	Surface data .....	24
6.5	Relative tool position .....	26
6.6	Tool position .....	27
6.7	Post processor information .....	29
6.8	Starting information record .....	34
6.9	Relative tool direction .....	35
6.10	Post processor parameters .....	36
6.11	Part program termination .....	39
6.12	Unsegmented tool path .....	40
6.13	Part contour description .....	43
6.14	Literal type post processor command .....	50
6.15	Deferred processing record .....	53
6.16	Proprietary records .....	54
Annex A (normative)	Rules for representing the RL on record oriented media .....	55
Annex B (normative)	Rules used in the syntax definitions .....	56
