ISO 23704-4:2026-08 (E)

General requirements for cyber-physically controlled smart machine tool systems (CPSMT) - Part 4: Requirements and guidelines for implementing reference architecture of CPSMT for subtractive manufacturing

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms,definitionsandabbreviations 1
3.1 Terms and definitions 2
3.2 Abbreviated terms 6

4 Conformance with requirements and guidelines for implementation of a CPSMT for subtractive manufacturing 7

5 Goals and objectives of the implementation guidelines for subtractive manufacturing 7
5.1 Goals 7
5.2 Context of this document 7

6 Concept of implementation architecture (IA) and guidelines of CPSMT for subtractive manufacturing (SM) 8
6.1 General 8
6.2 Concept of implementation architecture (IA) of CPSMT for subtractive manufacturing (SM) 9
6.3 Concept of implementation guidelines (IG) of CPSMT for subtractive manufacturing (SM) 10

7 Implementation architecture (IA) of CPSMT viewed from CPCM 11
7.1 General 11
7.2 Implementation architecture (IA) for CPCM 11

8 Implementation architecture (IA) of CPSMT viewed from CSSM 12
8.1 General 12
8.2 Implementation architecture (IA) for CSSM 13

9 Implementation guidelines (IGs) for information model of CPSMT 15
9.1 General 15
9.2 Information model for CPSMT primary system 15
9.3 Information model for CNC interface 16
9.4 Information model for MTU state data model in DTU of CSSM 17
9.5 Information model for MTU context data model in DTU of CSSM 18

10 Implementation guideline (IG) of communication model for CPSMT 19
10.1 General 19
10.2 Communication model for CPSMT 20

11 Implementation guideline (IG) for Integration model for CPSMT 20
11.1 General 20
11.2 Reference integration model for CPSMT 21

11.3 Variations and determination of integration model 22

Annex A (informative) Systems engineering for CPSMT 24

Annex B (informative) Use case for a smart factory platform based on this document 27

Annex C (informative) Use case for a detailed design for implementing architecture of CPSMT 30
