## Metallic powders, excluding powders for hardmetals - Determination of compressibility in uniaxial compression

---

| <b>Contents</b>    |                                       | <b>Page</b> |
|--------------------|---------------------------------------|-------------|
| Foreword .....     |                                       | iv          |
| 1                  | Scope .....                           | 1           |
| 2                  | Normative references .....            | 1           |
| 3                  | Terms and definitions .....           | 1           |
| 4                  | Symbols .....                         | 1           |
| 5                  | Principle .....                       | 1           |
| 6                  | Apparatus .....                       | 2           |
| 7                  | Sampling .....                        | 5           |
| 8                  | Procedure .....                       | 5           |
| 8.1                | Cleaning of the die and punches ..... | 5           |
| 8.2                | Powder testing conditions .....       | 5           |
| 8.3                | Lubrication .....                     | 6           |
| 8.3.1              | General .....                         | 6           |
| 8.3.2              | Die wall lubrication .....            | 6           |
| 8.3.3              | Lubrication of powder .....           | 6           |
| 8.4                | Compacting and ejection .....         | 6           |
| 8.5                | Compacting pressures .....            | 6           |
| 9                  | Expression of results .....           | 8           |
| 10                 | Precision .....                       | 8           |
| 11                 | Test report .....                     | 8           |
| Bibliography ..... |                                       | 9           |
