ISO/IEC 3532-1:2023-06 (E)

Information technology - Medical image-based modelling for 3D printing - Part 1: General requirements

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions and abbreviated terms **1**
3.1 Terms and definitions 1
3.2 Abbreviated terms 4

4 Overview of image processing for the medical industry **5**
4.1 Process flow 5
4.1.1 3D printing process for medical applications 5
4.1.2 Explanation of a typical use case (cranial implant case) 5

5 General requirements **6**

6 Requirements of data processing **7**
6.1 Medical image data flow 7
6.2 Medical image acquisition/computed tomography scan 8
6.3 Segmentation 9
6.4 3D reconstruction and visualization 11
6.5 Calibration and validation of 2D and 3D conversion 12
6.6 File format 13

Annex A (informative) **Reporting** **14**

Bibliography **15**
