

ISO/IEC 3532-1:2023-06 (E)

Information technology - Medical image-based modelling for 3D printing - Part 1: General requirements

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms, definitions and abbreviated terms		1
3.1 Terms and definitions		1
3.2 Abbreviated terms		4
4 Overview of image processing for the medical industry		5
4.1 Process flow		5
4.1.1 3D printing process for medical applications		5
4.1.2 Explanation of a typical use case (cranial implant case)		5
5 General requirements		6
6 Requirements of data processing		7
6.1 Medical image data flow		7
6.2 Medical image acquisition/computed tomography scan		8
6.3 Segmentation		9
6.4 3D reconstruction and visualization		11
6.5 Calibration and validation of 2D and 3D conversion		12
6.6 File format		13
Annex A (informative) Reporting		14
Bibliography		15
