DIN EN ISO/ASTM 52902:2023-12 (E)

Additive manufacturing - Test artefacts - Geometric capability assessment of additive manufacturing systems (ISO/ASTM 52902:2023)

Contents

Page

European foreword 4

Foreword 5

1 Scope 6

2 Normative references 6

3 Termsanddefinitions 6

4 Significanceanduse 6
4.1 General 6
4.2 Comparing results from one machine 7

5 General principles for producing test artefacts 7
5.1 General 7
5.2 Need to use feedstock conforming to a material specification 7
5.3 Need to undertake artefact building according to a documented process specification 7
5.4 File formats and preparation 8
5.5 Download files 8
5.6 Discussion of file conversion 8
5.7 AMF preferred (with conversion instructions/ resolutions) 8
5.8 Need for test specification and test process 8
5.9 Quantity of test artefacts 8
5.10 Position and orientation of test artefacts 9
5.11 Considerations for orientation 9
5.12 Labelling 9
5.13 Coverage 9
5.14 Arrays 9
5.15 Part consolidation 9
5.16 Supports and post processing 10

6 General principles for measuring artefacts 10
6.1 General 10
6.2 Measure parts as built 10
6.3 Measurement strategy 10
6.4 Measurement uncertainty 11

7 Artefact geometries 11
7.1 General 11
7.2 Accuracy 11
7.2.1 Linear artefact 11
7.2.2 Circular artefact 13
7.2.3 Z-axis artefact 15
7.3 Resolution 18
7.3.1 Resolution pins 18
7.3.2 Resolution holes 19
7.3.3 Resolution rib 21
7.3.4 Resolution slot 23
7.4 Surface texture 25
7.4.1 Purpose 25

7.4.2 Geometry 25
7.4.3 Measurement 26
7.4.4 Reporting 27
7.4.5 Considerations 27
7.5 Labelling 28
7.5.1 Purpose 28
7.5.2 Geometry 28
7.5.3 Considerations 29

Annex A (informative)Exampleartefactconfigurations 30

Annex B (informative) Measurement techniques 32

Annex C (informative) Measurement procedures 36

Annex D (informative) List of specimen names and sizes 43

Bibliography 45
