ISO/ASTM 52939:2023-12 (E)

Additive manufacturing for construction - Qualification principles - Structural and infrastructure elements

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Constructability, assessment and review 3
4.1 General 3
4.2 AC feasibility assessment 4
4.3 Validation plan 5

5 Infrastructure of the AC cell 5

6 Qualification of the additive construction process 8
6.1 Quality-relevant process steps within the additive construction process 8
6.2 Data preparation 9
6.3 Requirements for the material management 10
6.4 System related pre-processing 11
6.5 Built process guidance 12
6.6 System (default) post-processing 13
6.7 Process qualification 14

7 Quality assurance 15
7.1 General 15
7.2 Personnel requirements 15
7.3 Documentation and tracing of the process steps 16
7.4 Quality controls 17
7.5 Delivery and logistics 18

Annex A (informative) Supplementary information 19

Annex B (informative) Examples for AC quality assurance 28

Annex C (informative) Examples for quality assurance steps in built process guidance 34

Annex D (informative) Examples for specific processes 36

Bibliography 38
