

# ISO/ASTM 52939:2023-12 (E)

## Additive manufacturing for construction - Qualification principles - Structural and infrastructure elements

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....  | 1           |
| 3                     | Terms and definitions .....   | 1           |
| 4                     | Constructability, assessment and review .....                                 | 3           |
| 4.1                   | General .....   | 3           |
| 4.2                   | AC feasibility assessment .....   | 4           |
| 4.3                   | Validation plan .....   | 5           |
| 5                     | Infrastructure of the AC cell .....   | 5           |
| 6                     | Qualification of the additive construction process .....                      | 8           |
| 6.1                   | Quality-relevant process steps within the additive construction process ..... | 8           |
| 6.2                   | Data preparation .....  | 9           |
| 6.3                   | Requirements for the material management .....                                | 10          |
| 6.4                   | System related pre-processing .....   | 11          |
| 6.5                   | Built process guidance .....  | 12          |
| 6.6                   | System (default) post-processing .....  | 13          |
| 6.7                   | Process qualification .....   | 14          |
| 7                     | Quality assurance .....   | 15          |
| 7.1                   | General .....   | 15          |
| 7.2                   | Personnel requirements .....  | 15          |
| 7.3                   | Documentation and tracing of the process steps .....                          | 16          |
| 7.4                   | Quality controls .....  | 17          |
| 7.5                   | Delivery and logistics .....  | 18          |
| Annex A (informative) | Supplementary information .....   | 19          |
| Annex B (informative) | Examples for AC quality assurance .....                                       | 28          |
| Annex C (informative) | Examples for quality assurance steps in built process guidance .....          | 34          |
| Annex D (informative) | Examples for specific processes .....   | 36          |
| Bibliography .....    |   | 38          |
