

ISO/ASTM 52953:2025-08 (E)

Additive manufacturing for metals - General principles - Registration of data acquired from process monitoring and for quality control

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative reference	1
3	Terms, definitions and abbreviated terms	1
3.1	Terms and definitions	1
3.2	Abbreviated terms	2
4	Significance and use	3
5	Data registration procedure	3
6	Sensor categorization and metadata items	4
6.1	Sensor categorization	4
6.2	Metadata in in-situ measurement	4
6.2.1	Laser-scanning-related data elements	4
6.2.2	Layer-wise images	5
6.2.3	Registering melt pool monitoring images	6
6.3	Ex-situ XCT measurements metadata elements	7
6.4	Sources of uncertainty	7
7	Data alignment with coordinate system transformations	8
7.1	General	8
7.2	Methodology overview	8
7.3	Melt pool image, scan path, and layer-wise image alignment	10
7.3.1	General	10
7.3.2	Melt pool image to scan path alignment	10
7.3.3	Scan path to build platform alignment	12
7.3.4	Layer-wise image to the build platform alignment	13
7.4	Layer-wise images alignment	14
7.5	Layer-wise images to the related XCT model alignment	15
7.6	CMM Model to CAD model alignment	16
7.7	Global coordinate system	17
Annex A (informative)	Sensors and inspection systems categorization	18
Annex B (informative)	Examples of candidate global coordinate systems	21
Annex C (informative)	Edge fitting	22
Bibliography		24
