

ISO/ASTM 52919:2025-09 (E)

Additive manufacturing - Qualification principles - Test methods for metal casting sand moulds

| Contents | | Page |
|--|---|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Standard practice for sampling specimens of AM-made sand moulds | 1 |
| 4.1 | Factors causing uneven properties in an AM-made sand mould | 1 |
| 4.2 | Sampling specimens of an AM-made sand mould | 2 |
| 5 | Test methods applicable to evaluating an AM-made sand mould | 2 |
| 5.1 | General | 2 |
| 5.2 | Requirements for sampling test specimens of an AM-made sand mould | 2 |
| 5.3 | Applicable test methods | 3 |
| 5.3.1 | General | 3 |
| 5.3.2 | Tensile strength test | 3 |
| 5.3.3 | Bending/transverse strength test | 4 |
| 5.3.4 | Gas permeability test | 4 |
| 5.3.5 | Thermal expansion test | 4 |
| 6 | Documentation | 5 |
| 6.1 | General | 5 |
| 6.2 | Purchasing an AM-made sand mould | 5 |
| 6.3 | Verifying AM machine performance | 5 |
| Annex A (normative) Identifier and orientation index of a specimen | | 7 |
| Annex B (informative) Example of sampling test specimens and reporting table | | 8 |
| Bibliography | | 13 |
