DIN EN ISO/ASTM 52919:2025-12 (E)

Additive manufacturing - Qualification principles - Test methods for metal casting sand moulds (ISO/ASTM 52919:2025)

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Standard practice for sampling specimens of AM-made sand moulds ... **1**
4.1 Factors causing uneven properties in an AM-made sand mould ... 1
4.2 Sampling specimens of an AM-made sand mould ... 2

5 Test methods applicable to evaluating an AM-made sand mould ... **2**
5.1 General ... 2
5.2 Requirements for sampling test specimens of an AM-made sand mould ... 2
5.3 Applicable test methods ... 3
5.3.1 General ... 3
5.3.2 Tensile strength test ... 3
5.3.3 Bending/transverse strength test ... 4
5.3.4 Gas permeability test ... 4
5.3.5 Thermal expansion test ... 4

6 Documentation ... **5**
6.1 General ... 5
6.2 Purchasing an AM-made sand mould ... 5
6.3 Verifying AM machine performance ... 5

Annex A (normative) **Identifier and orientation index of a specimen** ... **7**

Annex B (informative) **Example of sampling test specimens and reporting table** ... **8**

Bibliography ... **13**
