

DIN EN ISO/ASTM 52929:2026-04 (E)

Additive manufacturing of metals - Powder bed fusion - Presentation of material properties in material data sheets (ISO/ASTM 52929:2025)

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviations	1
5 Material properties to be displayed	2
6 Optional material properties to be displayed	2
7 Boundary conditions for the determination of material properties	3
7.1 General.....	3
7.2 Applied PBF machine(s).....	3
7.3 Applied feedstock.....	3
7.4 Applied process parameters.....	4
7.5 Applied shielding gas.....	4
7.6 Applied powder spreading device.....	4
7.7 Post-processing applied.....	4
8 Material property testing	5
8.1 General.....	5
8.2 Tensile testing.....	5
8.3 Hardness testing.....	6
8.4 Density testing.....	6
9 Generating and handling test data	6
9.1 Number of specimens and build jobs.....	6
9.2 Combination of data.....	7
10 Reporting of characteristic values	8
Annex A (informative) Example of a material data sheet	10
Bibliography	14
