## Additive manufacturing of metals - Powder bed fusion - Classification of imperfections

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....  | 1           |
| 3                     | Terms and definitions .....   | 1           |
| 4                     | Classification of imperfections .....   | 4           |
| 4.1                   | General .....   | 4           |
| 4.2                   | Designation .....   | 5           |
| 4.3                   | Detailed classification of imperfections occurring in additive manufacturing .....    | 5           |
| 4.3.1                 | General .....   | 5           |
| 4.3.2                 | Crack .....   | 6           |
| 4.3.3                 | Porosity .....  | 6           |
| 4.3.4                 | Inclusions .....  | 6           |
| 4.3.5                 | Lack of fusion .....  | 6           |
| 4.3.6                 | Shape, dimensional and surface imperfections .....                                    | 6           |
| 4.3.7                 | Other imperfections .....   | 6           |
| Annex A (informative) | Illustration of imperfections and associated visual and metallographic controls ..... | 22          |
| Annex B (informative) | Imperfections deriving from issues related to the process or to the equipment .....   | 36          |
| Annex C (informative) | Powder imperfections .....  | 40          |
| Annex D (informative) | Imperfections appearing at subsequent production steps .....                          | 41          |
| Bibliography .....    |   | 42          |
