Geosynthetics — Installing and retrieving samples in the field for durability assessment

Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	Principle
5	Test method
5.1	Identification of the initial conditions
5.2	Durability testing samples
5.3	Preparation of control specimens
5.4	Retrieval of samples
5.5	Testing and analysis
5.5.1	Testing on retrieval samples
5.5.2	Testing on retrieval samples and control specimens
6	General report
Annex A	(informative) Identification forms for structure, environment and geosynthetic
