|-----------------|---|-------------|
| Foreword .....  |   | iv          |
| 1               | Scope .....                                 | 1           |
| 2               | Normative references .....                  | 1           |
| 3               | Terms and definitions .....                 | 1           |
| 4               | Principle .....                             | 1           |
| 5               | Apparatus .....                             | 1           |
| 5.1             | Abrasion tester .....                       | 1           |
| 6               | Test specimens .....                        | 2           |
| 7               | Conditioning .....                          | 2           |
| 8               | Procedure .....                             | 2           |
| 9               | Calculation and expression of results ..... | 3           |
| 10              | Test report .....                           | 3           |
