Annex A (normative) Factors to be considered in selection of microorganisms for demonstrating microbicidal effectiveness	
Annex B (normative) Approach 1 Process definition based on inactivation of the microbial population in its natural state	24
Annex C (normative) Approach 2 Process definition based on inactivation of reference microorganisms and knowledge of bioburden	25
Annex D (normative) Approach 3 Conservative process definition based on inactivation of reference microorganisms	26
Annex E (informative) Guidance on application of this International Standard	28
