

DIN SPEC 91345:2016-04 (E)

Reference Architecture Model Industrie 4.0 (RAMI4.0)

Contents		Page
Foreword		4
Introduction		5
1 Scope		6
2 Normative references		6
3 Terms and definitions		6
4 Assets in Industrie 4.0		9
4.1 The object world		9
4.2 Information carriers		9
4.3 Assets and the information world		10
4.4 Life ("vita") and characterization of an asset		11
4.5 Means by which an asset is presented, or made known in the information system		12
4.5.1 General		12
4.5.2 Unknown assets		13
4.5.3 Anonymously known assets		13
4.5.4 Individually known assets		13
4.5.5 Assets administered as entities		13
4.6 State in the lifetime ("vita")		14
4.6.1 General		14
4.6.2 Type		14
4.6.3 Instance		15
4.7 Communication capability		15
4.7.1 Communication capability of assets in the physical world		15
4.7.2 Communication capability of assets in the information world		16
4.8 Classification of assets in terms of presentation and communication capability		17
4.9 Representation by means of information and technical functionality		18
5 Reference Architecture Model Industrie 4.0 (RAMI4.0)		19
5.1 General		19
5.2 Architecture axis ("Layers")		20
5.2.1 Overview		20
5.2.2 Business layer		20
5.2.3 Functional layer		20
5.2.4 Information layer		21
5.2.5 Communication layer		21
5.2.6 Integration layer		22
5.2.7 Asset layer		22
5.3 Life cycle & value stream axis		23
5.4 Hierarchy axis		23
6 Industrie 4.0 components		24
6.1 General		24
6.1.1 Overview		24
6.1.2 Properties of I4.0 components		24
6.1.3 Identifiability		25
6.1.4 State in the lifetime ("vita")		25
6.1.5 Secure I4.0-compliant communication, services and quality of service		25
6.1.6 Representation by information with I4.0-compliant semantics		26

6.1.7	I4.0 system consisting of I4.0 components	27
6.1.8	Nestability	27
6.1.9	Encapsulability	28
6.1.10	Domain specific functionality and state model	29
6.2	Administration shell of I4.0 components	30
6.2.1	General	30
6.2.2	Basic structure of the administration shell	30
6.2.3	DF header and DF body	30
6.2.4	Partial models and views	31
6.2.5	Properties	33
6.2.6	Managing the administration shell	35
6.2.7	Fundamental requirements for the administration shell	37
6.3	Forms of I4.0 components	38
6.3.1	Different assets with administration shells	38
6.3.2	Asset with multiple administration shells	39
6.3.3	Administration shell for multiple assets	39
	Bibliography	40
