

DIN SPEC 16592:2016-12 (D)

Kombinieren von OPC Unified Architecture und Automation Markup Language

Inhalt	Seite
Foreword	4
1 Scope.....	6
2 Normative references	6
3 Terms and definitions.....	7
4 Symbols and abbreviated terms.....	7
5 AML model mapping to OPC Unified Architecture information model.....	8
5.1 AML modelling concept	8
5.2 How to map OPC Unified Architecture Namespaces	10
5.3 How to map AML model elements.....	11
5.4 Mapping of AML XML DataTypes to OPC Unified Architecture DataTypes	18
5.5 AML base types for OPC Unified Architecture information model	20
5.5.1 ObjectTypes.....	20
5.5.2 ReferenceTypes	23
5.5.3 VariableTypes.....	25
5.5.4 Structure DataTypes.....	28
5.5.5 OPC Unified Architecture Objects used to organize the AdressSpace structure.....	29
5.6 Mapping of AML libraries.....	32
5.7 Mapping of multiple AML documents	32
6 Integration of OPC Unified Architecture configuration information into AML models.....	34
7 Relation to other standards and specifications	35
Annex A (informative) Industrial application	37
A.1 General.....	37
A.2 Use Case 1: Information lifecycle management.....	40
A.3 Use Case 2: Up-to-date description of the system as-is	41
A.4 Use Case 3: Information exchange (e.g. asset information, quality information, diagnostic data, etc.) with MES or SCADA systems for system operation.....	42
A.5 Use Case 4: Lossless exchange of OPC Unified Architecture system configuration.....	43
A.6 Use Case 5: Communicate/Operationalize AML by means of OPC Unified Architecture	43
A.7 Use Case 6: Mixed simulation environments.....	45
A.8 Use Case 7: Lossless storage and retrieval of system engineering information for system maintenance, repair, overhaul (MRO).....	45
A.9 Use Case 8: Manufacturing change management.....	46
A.10 Use Case 9: Lossless storage and retrieval of system engineering information for manufacturing system reconfiguration	47
Annex B (informative) Mapping example	49
Annex C (informative) AML base types NodeSet.....	62
Bibliography	67
