

DIN SPEC 91347:2018-03 (E)

Integrated multi-functional Humble Lamppost (imHLa)

Contents		Page
Foreword		5
Introduction		7
1 Scope		10
2 Normative references		11
3 Terms and definitions		11
4 Symbols and abbreviations		14
5 Use cases		15
5.1 Introduction		15
5.2 Event-controlled adaptive street lighting system		16
5.2.1 Brief description		16
5.2.2 Use scenario		17
5.2.3 Implementation		17
5.3 Traffic monitoring		18
5.3.1 Brief description		18
5.3.2 Use scenario		18
5.3.3 Implementation		19
5.4 Intelligent communication between vehicles and the imHLa		19
5.4.1 Brief description		19
5.4.2 Use scenarios		19
5.4.3 Implementation		20
5.5 Public Wi-Fi		20
5.5.1 Brief description		20
5.5.2 Use scenario		20
5.5.3 Implementation		21
5.6 Wireless network support with a picocell or microcell		22
5.6.1 Brief description		22
5.6.2 Use scenario		22
5.6.3 Implementation		22
5.7 Environmental data acquisition		23
5.7.1 Brief description		23
5.7.2 Use scenario		23
5.7.3 Implementation		23
5.8 Charging station for electric vehicles		24
5.8.1 Brief description		24
5.8.2 Use scenario		24
5.8.3 Implementation		24
5.9 Drone charging infrastructure		25
5.9.1 Brief description		25
5.9.2 Use scenario		25
5.9.3 Implementation		26
5.10 Energy storage		26
5.10.1 Brief description		26
5.10.2 Use scenario		26
5.10.3 Implementation		27
5.11 Remote maintenance		28
5.11.1 Brief description		28

5.11.2	Use scenario	28
5.11.3	Implementation	28
5.12	Public security	29
5.12.1	Brief description	29
5.12.2	Use scenario	29
5.12.3	Implementation	30
5.13	Private security and surveillance	30
5.13.1	Brief description	30
5.13.2	Use scenario	30
5.13.3	Implementation	30
5.14	Signage and advertising	31
5.14.1	Brief description	31
5.14.2	Use scenario	31
5.14.3	Implementation	32
6	Integrated utilization concept	32
6.1	General	32
6.2	Roles and responsibilities	33
6.3	Target groups	34
6.3.1	General	34
6.3.2	Administration and municipal utilities	34
6.3.3	Service economy and industry	35
6.3.4	Developers and start-ups	35
6.3.5	Citizens	35
6.4	Organizational and operating models	35
6.5	Financing and business models	36
6.5.1	General	36
6.5.2	Smart city ecosystem	37
6.5.3	Business models for two-sided or multi-sided platforms	38
6.5.4	Combined business models	39
7	Logical architecture of an imHLA	39
7.1	General	39
7.2	Physical integration	40
7.3	Electrical integration	41
7.4	Communication integration	41
7.5	Functional components	42
7.6	Digital integration	43
7.7	Data integration	44
7.8	Integration of digital services	45
8	Design principles	46
8.1	Integration of infrastructures and interoperability	46
8.1.1	General	46
8.1.2	Mechanical and electrical integration	47
8.1.3	Communication	47
8.1.4	Data exchange and interoperability	48
8.1.5	Authentication and identity management	48
8.2	Open interfaces and protocols	48
8.3	Security, privacy and trust	50
8.3.1	Security by design	50
8.3.2	Privacy by design	50
8.4	Functional safety	51
8.5	Reliability, warranty and guarantee	52
9	Classification	52
10	Designation	54
(informative) Recommendations		55Annex A
