

DIN EN 14885:2019-06 (E)

Chemical disinfectants and antiseptics - Application of European Standards for chemical disinfectants and antiseptics

Contents

Page

European foreword	3
Introduction	4
1 Scope	5
2 Normative references	6
3 Terms and definitions	7
3.1 Chemical disinfectant or antiseptic procedures and product types	7
3.2 Chemical disinfectant or antiseptic action	9
3.3 General terms	11
4 Procedures for claiming activity	12
4.1 Category of tests	12
4.2 General	13
4.3 Chemical disinfectants and antiseptics for use in the medical area	14
4.3.1 General	14
4.3.2 Fields of application / Standards necessary to be passed for basic and additional label claims	16
4.4 Chemical disinfectants and antiseptics for use in the veterinary area	29
4.5 Chemical disinfectants and antiseptics for use in food, industrial, domestic and institutional areas	37
5 Precision of the test methods (Repetitions)	57
6 Proficiency testing	58
7 Minimum information for the user including labelling regarding efficacy claims and use recommendations	58
8 Changes in European Standards	59
8.1 Revision of European Standards	59
Annex A (informative) Recommendations on the use of terms and definitions in the area of disinfection and antiseptics	60
Annex B (informative) Recommendations on claims of activity on the basis of tests additional to or other than the tests specified in this European Standard	62
Annex C (informative) Phase 3 tests	63
C.1 General	63
C.2 Comparison with phase 2 tests	63
C.3 Requirement for a phase 3 test	64
C.4 Scope of phase 3 tests	64
C.5 Safety	64
C.6 Design of a phase 3 test	65
C.7 Performance of a phase 3 test	66
C.8 Results of a phase 3 test	67
