

DIN SPEC 91391-2:2019-04 (E)

Common Data Environments (CDE) for BIM projects - Function sets and open data exchange between platforms of different vendors - Part 2: Open data exchange with Common Data Environments

Contents	Page
Foreword	4
Introduction.....	5
1 Scope	6
2 Normative References.....	6
3 Terms and Definitions	6
4 Specification of the openCDE Interface.....	7
4.1 General	7
4.2 Base Principles	7
4.3 Meta-Information about information containers	8
4.4 Connection Establishment.....	10
4.5 Container Types	10
5 Example for the Implementation of an openCDE-compliant Interface.....	11
5.1 General	11
5.2 Query supported API version numbers.....	11
5.3 Establish Connection	11
5.4 Close Connection.....	12
5.5 Find Accessable Projects.....	12
5.6 Information about a Project	12
5.7 Query Container Types.....	12
5.8 Query Information Containers.....	12
5.9 Upload Information Containers	13
5.10 Query for Information Containers.....	13
5.11 Update Information Containers	13
6 openCDE API Use Cases.....	14
6.1 General	14
6.2 Query Information Containers.....	15
6.3 Filtering und Sorting of Information Containers.....	15
6.4 Delivery of Information Containers.....	16
6.5 Updating Information Containers	16
Annex A (informative) Use Cases	17
A.1 General	17
A.2 Example: Facility Management — Maintenance of Fire Protection Systems and Equipment.....	17
A.2.1 General	17
A.2.2 Document Structure	18
A.3 Risk Protection (RP).....	20
A.3.1 General	20
A.3.2 Document Structure	22
Bibliography.....	28

Figures

Figure 1 — Splitting metadata of a container into mandatory and optional parameters	8
Figure 2 — Information container in a project: a) Abstract structure of an information container, b) Container with with two internal structures (IFC, DWG), c) Multi-container containing sub-structures (IFC, IFC), d) Multi-container with references to further containers (1004, 1005, etc.).....	11
Figure 3 — BPMN swimlane diagram. Procedure in general for the compilation and provision of an application-specific information container	14
Figure A.1 — BPMN swimlane diagram — Creation of an openCDE information container for facility management information.....	19
Figure A.2 — BPMN Swimlane diagram — Creation of an openCDE information container for risk information. The creation of the information container is repeated, if necessary, for the reassessment of risks	21

Tables

Table 1 — Predefined Parameters in the first part of conatiner metadata	9
