DIN SPEC 16457:2019-12 (E)

Short fiber reinforced thermoplastics - Tension-compression-shear test with tube specimens under cyclic loading

Contents

Page

Foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Normative references ... 6

3 Terms, definitions, abbreviated terms and symbols ... 7
3.1 General ... 7
3.2 Abbreviated terms and symbols ... 7
3.3 Terms and definitions ... 10

4 Test equipment ... 13
4.1 Testing machine and gripping ... 13
4.2 Strain measurement ... 14
4.3 Micrometer gauge, thickness gauge or dial gauge ... 15

5 Test specimens ... 15
5.1 Geometry and stability ... 15
5.1.1 General ... 15
5.1.2 Type A test specimen ... 15
5.1.3 Type B test specimen ... 16
5.2 Preparation of test specimens ... 16
5.3 Measurement of test specimens ... 17
5.3.1 Geometry ... 17
5.3.2 Determining the fibre orientation and particle content ... 17
5.4 Number of test specimens ... 17
5.5 Pretreatment of test specimens ... 17

6 Testing ... 18
6.1 Preliminary work ... 18
6.2 Test climate ... 18
6.3 Quasi-static testing ... 18
6.3.1 General ... 18
6.3.2 Recording the results ... 18
6.4 Cyclic loading ... 18
6.4.1 Harmonic loading ... 18
6.4.2 Other load levels ... 19
6.4.3 Combined loading ... 19
6.5 Failure criteria ... 19

7 Definition and calculation of characteristic quantities ... 20
7.1 Static measurements ... 20
7.1.1 Calculating stresses ... 20
7.1.2 Calculating the moduli ... 20
7.2 Statistical evaluation of static parameters ... 21
7.2.1 General ... 21
7.2.2 Means and standard deviations ... 21
7.2.3 Confidence interval and survival probabilities ... 22
7.3 Fatigue testing ... 22

7.3.1 Objectives and representation of results ... **22**
7.3.2 Evaluation of results ... **24**
7.4 Tables for calculations ... **29**
8 Test report ... **37**
8.1 General ... **37**
8.2 Static tests ... **38**
8.3 Fatigue testing ... **38**
Annex A (informative) **Type A tubular test specimen** ... **40**
Annex B (informative) **Type B tubular test specimen** ... **44**
Annex C (informative) **Comparison of stress distribution in type A and type B specimens** ... **47**
Annex D (informative) **Calculation of confidence interval for $g > 0{,}05$** ... **50**
Annex E (informative) **Calculation examples** ... **51**
Annex F (informative) **Specimen test record** ... **55**
Bibliography ... **57**
