European foreword	4
Foreword	5
Introduction	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	7
4 Risk management	14
4.1 Risk management process	14
4.2 Management responsibilities	15
4.3 Qualification of personnel	16
4.4 Risk management plan	16
4.4.1 General	16
4.4.2 Scope of the plan	17
4.4.3 Contents of the plan	17
4.4.4 Revisions to the plan	17
4.4.5 Risk management documentation	18
5 Risk analysis	18
5.1 General	18
5.2 Risk analysis process and documentation	19
5.3 Intended medical laboratory use and reasonably foreseeable misuses	19
5.4 Identification of characteristics related to safety	19
5.5 Identification of hazards	19
5.6 Identification of potentially hazardous situations	20
5.7 Identification of foreseeable patient harms	20
5.8 Estimation of the risk(s) for each hazardous situation	20
6 Risk evaluation	21
6.1 Risk acceptability criteria	21
6.2 Risk evaluation process	22
7 Risk control	22
7.1 Risk control options	22
7.2 Risk control verification	23
7.3 Role of standards in risk control	23
7.4 Role of IVD medical devices in risk control	23
7.5 Risks arising from risk control measures	23
7.6 Residual risk evaluation	23
8 Benefit-risk analysis	24
9 Risk management review	24
9.1 Completeness of risk control	24
9.2 Evaluation of overall residual risk	24
9.3 Risk management report	25
10 Risk monitoring, analysis and control activities	25
10.1 Surveillance procedure	25
10.2 Internal sources of risk information	26
10.3 External sources of risk information	26
10.4 Immediate actions to reduce risk	26

Annex A (informative) Implementation of risk management within the quality management system	27
Annex B (informative) Developing a risk management plan	37
Annex C (informative) Risk acceptability considerations	39
Annex D (informative) Identification of characteristics related to safety	42
Annex E (informative) Examples of hazards, foreseeable sequences of events and hazardous situations	49
Annex F (informative) Nonconformities potentially leading to significant risks	57
Annex G (informative) Risk analysis tools and techniques	65
Annex H (informative) Risk analysis of foreseeable user actions	70
Annex I (informative) Methods of risk assessment, including estimation of probability and severity of harm	74
Annex J (informative) Overall residual risk evaluation and risk management review	80
Annex K (informative) Conducting a benefit-risk analysis	82
Annex L (informative) Residual risk(s)	85
Bibliography	86
