## Wheelchair seating - Part 12: Envelopment and immersion characterization of seat cushions using a dual semispherical indenter

---

| Contents                                                              | Page      |
|-----------------------------------------------------------------------|-----------|
| Foreword.....                                                         | iv        |
| Introduction.....                                                     | v         |
| <b>1 Scope.....</b>                                                   | <b>1</b>  |
| <b>2 Normative references.....</b>                                    | <b>1</b>  |
| <b>3 Terms and definitions.....</b>                                   | <b>1</b>  |
| <b>4 Indenter construction.....</b>                                   | <b>2</b>  |
| 4.1 Materials.....                                                    | 2         |
| 4.2 Tolerances and finishes.....                                      | 2         |
| 4.3 Indenter elements.....                                            | 2         |
| 4.3.1 Trochanter bar.....                                             | 2         |
| 4.3.2 Trochanter blocks.....                                          | 3         |
| 4.3.3 Semispherical indenter half.....                                | 4         |
| 4.4 Indenter assembly.....                                            | 5         |
| 4.5 Sensor locations.....                                             | 6         |
| 4.5.1 General.....                                                    | 6         |
| 4.5.2 Elevation a.....                                                | 7         |
| 4.5.3 Elevation b.....                                                | 7         |
| 4.5.4 Elevation c.....                                                | 7         |
| 4.5.5 Elevation d.....                                                | 7         |
| <b>5 Instrumentation hardware.....</b>                                | <b>8</b>  |
| 5.1 Sensors.....                                                      | 8         |
| 5.2 Timer.....                                                        | 8         |
| 5.3 Loading equipment.....                                            | 8         |
| 5.4 Rigid board.....                                                  | 8         |
| <b>6 Preparation of test cushion.....</b>                             | <b>8</b>  |
| 6.1 Cushion set up.....                                               | 8         |
| 6.2 Preconditioning the cushion to the test environment.....          | 9         |
| <b>7 Envelopment test method.....</b>                                 | <b>9</b>  |
| 7.1 Rationale.....                                                    | 9         |
| 7.2 Method.....                                                       | 9         |
| 7.2.1 Setting the datum height for the indenter.....                  | 9         |
| 7.2.2 Pre-conditioning the cushion.....                               | 9         |
| 7.2.3 Seat cushion thickness measurement.....                         | 9         |
| 7.2.4 Load application and data collection.....                       | 10        |
| 7.3 Calculations.....                                                 | 11        |
| 7.3.1 Envelopment.....                                                | 11        |
| 7.3.2 Immersion.....                                                  | 12        |
| <b>8 Test report.....</b>                                             | <b>12</b> |
| <b>Annex A (informative) Estimate of measurement uncertainty.....</b> | <b>14</b> |
| <b>Bibliography.....</b>                                              | <b>15</b> |
