

Business plan for a DIN SPEC project
according to the PAS procedure on
„Barbecue briquettes burning time“

Status:
**for developing DIN SPEC after adoption
on 02.10.2024**

Requests to participate in the project and/or comments on the business plan
are to be **submitted by 16.09.2024**¹.

The request to participate as well as comments are submitted via
<https://www.din-events.de/>² with the log-in code **ds91523**.

Recipients of this business plan are requested to name all patent rights
known to them to be relevant to the project and to make available all
supporting documents.

Berlin, 22.10.2024 (Version 2)

¹ Applications for participating in the project and comments on the business plan that are not received by the deadline do not need to be taken into consideration. Once constituted, the project workshop will decide whether or not to consider the comments received in good time.

² If technical issues occur when submitting the registration or any comments via the provided link, please send them to Jessica.Frost@din.de.

1 Status/version of the business plan

- **For public commenting (Version 1)**

This business plan is intended to inform the public of a new DIN SPEC project. Any interested party can take part in this project and/or comment on this business plan. Please send any requests to participate or comments via <https://www.din-events.de/>³ with the log-in code ds91523.

Once this business plan is published, the Chairman of DIN's Executive Board decides whether or not the project is to be carried out.

If the project is accepted, all those who have applied for participation or have commented on the business plan by the deadline will be invited to the kick-off meeting of the project consortium.

- **For developing the DIN SPEC after adoption on 02.10.2024 (version 2)**

Changes to the previous version 1:

- Title page, clause 1: status changed to “For developing DIN SPEC after adoption on 02.10.2024”, as well as an update of the consecutive revision number (version 1 → version 2)
- Clause 2: Incorrectly inserted footnote → removed from the text
- Clause 2: Table of participating organizations added
- Clause 4: Kick-off meeting statements adjusted → e.g. “The kick-off took place (...)”
- Clause 7: Information on consortium leader added
- Project schedule (preliminary): adjusted

2 Initiator and other consortium members

- **Initiator:**

Person/Organization	Short description
Jesper Berg Lykkesfeldt, FS Consumer Products GmbH	Fritz Schur is a traditional distributor to the FMCG segment. We are active within multiple categories amongst others BBQ. Denmark is our homemarket, but we are also active in the Nordics as well as most Europe.

- **Other potential participants:**

This DIN SPEC will be developed in a consortium (temporary body) that is open to any interested party. The participation of other experts would be helpful and is desired. It is recommended that

- Manufacturers of barbecue briquettes

³ If technical issues occur when submitting the registration or any comments via the provided link, please send them to Jessica.Frost@din.de.

- Distributors of barbecue briquettes
- Research institutes
- Retailers
- Testing facilities

take part in the development of this DIN SPEC.

- **Organizations that have registered for participation**

Jesper Berg Lykkesfeldt	FS Consumer Products GmbH
Søren I. Pedersen	Cavron Global
Klaas Bokhorst	WR International BV
Jessica Frost	DIN e. V.

- **Organizations⁴, that have adopted this business plan (consortium members):**

Person	Organization
Jesper Berg Lykkesfeldt	FS Consumer Products GmbH
Søren I. Pedersen	PT. Cavron Global
Klaas Bokhorst	W.R.International B.V.
Daniel Haxter	Ruhr Lab GmbH

3 Objectives of the project

3.1 General

Consumer insights as well as information from the market, show clearly that the most important factors for the consumer when using briquettes is burning time. The aim is to establish a DIN SPEC that specifically addresses this important perspective to the consumer (and by so giving the retailers etc. a means to evaluate performance rather than specific content) and gives a uniform approach to comparing products originating from various regions and from various raw materials. Many new substances are used already and more will be used in the future. A burning time DIN SPEC will enable everybody in the industry to compare – and most importantly, give the consumer a direct and measurable factor to evaluate products on value vs performance. Existing standards (e. g. DIN EN 1860-2) measure for example carbon fix, ash and

⁴ Organizations are legal entities and natural persons, insofar as they participate in business transactions on a commercial or freelance basis. If several legal entities are part of a group or a corporate structure within the meaning of Section 15 of the German Stock Corporation Act (§ 15 Aktiengesetz) or Section 271 (2) of the German Commercial Code (§ 271 Absatz 2 Handelsgesetzbuch), they are deemed to be one organization.

volatile matter etc. The aim of this DIN SPEC is to add value by standardized measuring of the burning time. This DIN SPEC will compile the existing descriptions of barbecue briquettes and distil them into a summary of the requirements for measuring its burning time.

3.2 Planned scope

This document specifies requirements for measuring the burning time of barbecue briquettes that are used in food preparation, disregarding raw materials and production methods. This document is mainly intended for use by parties involved in the manufacturing, testing and distribution of barbecue briquettes.

3.3 Related activities

The subject of the planned DIN SPEC is not at present the subject of a standard. However, there are committees, standards and/or other technical rules that deal with related subjects and thus need to be taken into account - and involved or incorporated, where necessary - in this project:

- DIN EN 1860-1:2018-09 Appliances, solid fuels and firelighters for barbecuing - Part 1: Barbecues burning solid fuels - Requirements and test methods
- E DIN EN 1860-1:2023-09 Appliances, solid fuels and firelighters for barbecuing - Part 1: Barbecues burning solid fuels - Requirements and test methods
- DIN EN 1860-2:2023-08 Appliances, solid fuels and firelighters for barbecuing - Part 2: Barbecue charcoal and barbecue charcoal briquettes - Requirements and test methods
- DIN EN 1860-3:2023-08 Appliances, solid fuels and firelighters for barbecuing - Part 3: Firelighters for igniting solid fuels for use in barbecues and grill applications - Requirements and test methods
- DIN EN 1860-4:2023-08 Appliances, solid fuels and firelighters for barbecuing - Part 4: Single use barbecues burning solid fuels - Requirements and test methods
- DIN EN ISO 17225 (all parts), Solid biofuels - Fuel specifications and classes
- DIN SPEC 91346, Barbecue briquettes from high-purity carbon concentrate
- DIN Standards Committee Safety Design Principles (NASG) - NA 095-02-07 AA “Appliances, solid fuels and firelighters for barbecuing”
- DIN Standards Committee Materials Testing (NMP) - NA 062-05-82 AA “Solid biofuels”

4 Work programme

The aim of the project is to develop a DIN SPEC according to the PAS procedure (see www.din.de/go/din-spec-en). The DIN SPEC shall be consistent with the body of German standards and shall not be in conflict with any DIN Standard.

The kick-off meeting took place on 02.10.2024 via webconference (WebEx) and at DIN e. V., Burggrafenstr. 6, 10787 Berlin. The project duration will be about five months.

At this kick-off meeting, the consortium for developing the DIN SPEC was constituted, further organizational issues were decided on and clarified, and, where possible, work on the subject matter began.

A draft for public commenting will not be published.

A total of three project meetings (kick-off meeting and work meetings) and one web conference will be held, during which the content of the DIN SPEC will be presented, discussed and approved. The content of the DIN SPEC can be drawn up by individual consortium members or in working groups.

Dates of further meetings and/or web conferences are to be agreed on within the consortium in consultation with DIN.

The DIN SPEC will be drawn up in English (language of meetings, minutes, etc.). The DIN SPEC will be written in English.

NOTE The calculation covers only one language version. Please keep in mind the fact that other language versions involve additional expenses; for this reason, they shall be agreed on separately. If another language version is desired, Beuth/DIN can provide a translation. Requests for translations are to be submitted after the DIN SPEC manuscript has been approved for publication.

5 Resource planning

Each consortium member shall bear the expenses he/she incurs as a result of participation in the project.

If the DIN Executive Board approves the project, the initiator of the project will then conclude a contract with DIN.

The performance of this project as set out in the programme of work will result in DIN incurring costs to a total of 35.473 euros, excluding VAT. Additional services give rise to additional costs.

Sharing the burden of these costs is a prerequisite for membership in the consortium.

By adopting this business plan, consortium members declare their willingness to bear their share of the project costs, which is based on the number of consortium members.

Each consortium member is to declare this willingness to take on his/her share of costs by individual agreement with the initiator.

If the consortium is expanded later, the additional consortium members shall pay the initiator the same fee to cover costs as the original consortium members.

The initiator is obliged to use the financial resources that have been made available to him by the consortium members solely for purposes furthering the project, and to return any surplus amount in equal parts to all consortium members without delay.

6 Rules of cooperation in the DIN SPEC consortium

This project is governed by the PAS procedural rules. All interested parties and consortium members are to inform themselves of these procedures by going to www.din.de/go/din-spec-en.

The consortium will be constituted during the course of the kick-off meeting. The kick-off meeting will not take place until the business plan has been published and approved by DIN's Management Board. The consortium shall comprise at least three members from different organizations⁵. It is not necessary that these members come from different areas and represent different stakeholders. By approving this business plan, the interested parties declare their willingness to participate in the consortium and will be formally named as consortium members, with the associated rights and duties. Participants at the kick-off meeting who do not approve the business plan are not given the status of a consortium member and are thus excluded from further decisions made during the kick-off meeting and from any other decisions regarding the project.

If an organization (e.g. an association) sends someone who is not an employee to the consortium, this person shall be authorized by the organization, who shall provide proof of this to DIN.

Each consortium member is entitled to vote and has one vote. If an organization sends several experts to the consortium, that organization has only one vote, regardless of how many consortium participants it sends. Transferring voting rights to other consortium members is not permitted. During voting procedures, decisions are passed by simple majority; abstentions never count.

As a rule, the consortium is closed once it is constituted. The current consortium members shall decide whether any additional members will be accepted or not.

During the kick-off meeting, the consortium members shall elect a consortium leader, who is responsible for content management and any decision-making and voting procedures. The leader is supported by the responsible DIN Project Manager, whereby DIN will always remain neutral regarding the content of the DIN SPEC. Furthermore, the DIN Project Manager shall ensure that DIN's rules of procedure, rules of presentation, and the principles governing the publication of DIN SPEC have been observed. Should a consortium leader no longer be able to carry out his/her duties, the DIN Project Manager shall initiate the election of a new leader.

The DIN Project Manager is responsible for organizing and leading the kick-off meeting, in consultation with the initiator. Further project meetings and/or web conferences shall be organized by the DIN Project Manager in consultation with the consortium leader.

If consortium members cannot be present when the DIN SPEC or its draft is approved, an alternative means of including them in the voting procedure shall be used (e.g. in writing, electronically).

All consortium members who voted for the publication of the DIN SPEC or its draft will be named as authors in the Foreword, including the organizations which they represent. All consortium members who voted against the publication of the DIN SPEC or its draft, or who have abstained, will not be named in the Foreword.

Any expansion of the consortium at a later date is decided on by the members making up the consortium at that time. It is particularly important to consider these aspects:

- a) expansion would be conducive to shortening the duration of the project or to avoiding or averting an impending delay in the planned duration of the project;
- b) the expansion would not result in the project taking longer to complete;

⁵ Organizations are legal entities and natural persons, insofar as they participate in business transactions on a commercial or freelance basis. If several legal entities are part of a group or a corporate structure within the meaning of Section 15 of the German Stock Corporation Act (§ 15 Aktiengesetz) or Section 271 (2) of the German Commercial Code (§ 271 Absatz 2 Handelsgesetzbuch), they are deemed to be one organization.

- c) the new consortium member would not address any new or complementary issues beyond the scope defined and approved in the business plan;
- d) the new consortium member would bring complementary expertise into the consortium in order to incorporate the latest scientific findings and state-of-the-art knowledge;
- e) the new consortium member would actively participate in the drafting of the manuscript by submitting concrete, not abstract, proposals and contributions;
- f) the new consortium member would ensure wider application of the DIN SPEC.

To allow the legal reproduction and distribution of results for the purposes of project work, the consortium members grant DIN rights of use on the basis of the copyright that will accrue to them for the results of their work on the DIN SPEC. The transfer of these utilization rights does not prevent the consortium members from using and further developing the knowledge, experience and findings they bring to the project.

Consortium members are requested to inform DIN of all patent rights known to them to be relevant to this DIN SPEC project.

Subsequent changes to the scope (Section 3.2) or to the resource planning (Section 5) require, in addition to a two-thirds majority of all votes cast, the approval of DIN.
