

# DIN SPEC 91531:2026-01 (E)

## Annotation of recorded measurement and process data for the production of plastic packaging with recycled content; Text in English

---

### Contents

	Page
Foreword .....	10
Introduction.....	12
1 Scope.....	14
2 Normative references .....	14
3 Terms and definitions.....	14
4 Description of the ontology.....	15
4.1 General.....	15
4.2 Used Notation .....	16
4.3 Description of an investigation and its results .....	16
4.4 Description of production and measuring processes and their sequence .....	19
4.5 Description of machines, measuring devices, sensors as systems .....	23
4.6 Description of materials and products.....	23
4.7 Consideration of recyclate characteristics.....	24
4.8 Assignment to specific data in a data space .....	26
5 Alignment with existing standards and ontologies.....	27
5.1 General.....	27
5.2 Alignment with the Basic Formal Ontology and PROV-Ontology.....	27
5.3 Alignment with OPC UA Specifications .....	27
5.4 Alignment with the data model of the R-Cycle digital product pass .....	29
6 Class declarations.....	29
7 Object property declarations .....	47
8 Datatype property declarations .....	69
Bibliography.....	71

### Figures

Figure 1 — Example of the possible application of the defined ontology for the holistic annotation of data in a data space.....	12
Figure 2 — Notation for explaining the ontology .....	16
Figure 3 — Overview of classes and properties for the description of an <i>Investigation</i> and its results.....	17
Figure 4 — Overview of classes and properties for the division of <i>Investigation</i> into the <i>Measurement</i> and <i>Analysis</i> classes.....	17
Figure 5 — Overview of classes and properties for the division of <i>Features of interest</i> .....	18
Figure 6 — Example of the ontology-based description of a <i>Measurement</i> .....	18

Figure 7 — Example of the ontology-based description of an <i>Analysis</i> .....	19
Figure 8 — Overview of classes and properties for the assignment of a <i>Product data sheet</i> .....	19
Figure 9 — Example of the ontology-based description of a <i>Product data sheet</i> .....	19
Figure 10 — Overview of classes and properties for the Linking between a <i>Processing step</i> and a <i>Plan</i> .....	20
Figure 11 — Overview of classes and properties for the description of a <i>Processing step</i> .....	20
Figure 12 — Overview of classes and properties for the description of <i>Input</i> and <i>Output</i> of a <i>Processing step</i> .....	21
Figure 13 — Example of the ontology-based description of an investigation workflow.....	21
Figure 14 — Overview of classes and properties for the assignment of a <i>Process specification data sheet</i> .....	21
Figure 15 — Example of the ontology-based description of a <i>Process specification data sheet</i> .....	22
Figure 16 — Overview of classes and properties for the assignment of a involved <i>Machine</i> or <i>Machine module</i> .....	22
Figure 17 — Example of the ontology-based description of the assignment of a involved <i>Machine</i> or <i>Machine module</i> .....	22
Figure 18 — Overview of classes and properties for the division of a <i>System</i> .....	23
Figure 19 — Example of the ontology-based description of a <i>System</i> .....	23
Figure 20 — Overview of classes and properties for the description of a <i>Specific material item</i> .....	24
Figure 21 — Example of the ontology-based description of a <i>Specific material item</i> .....	24
Figure 22 — Overview of classes and properties for the consideration of recycle characteristics based on DIN SPEC 91446:2021-12 [1].....	24
Figure 23 — Example of the ontology-based consideration of recycle characteristics based on DIN SPEC 91446:2021-12 [1].....	25
Figure 24 — Exemplary “ <i>equivalent to</i> ”-statement to realize a reasoner-based classification of instances of <i>Recycling Product Data Sheet</i> .....	25
Figure 25 — Overview of classes and properties for the consideration of of recycle characteristics based on GS1 Web Vocabulary.....	26
Figure 26 — Example of the ontology-based consideration of recycle characteristics based on GS1 Web Vocabulary.....	26
Figure 27 — Overview of classes and properties for the assignment of specific data in a data space.....	26
Figure 28 — Example of the ontology-based assignment of specific data in a data space.....	27
Figure 29 — Alignment with the Basic Formal Ontology and PROV-Ontology.....	27
Figure 30 — Example for the assignment of a statement for a GS1 Digital Link.....	29
