ISO 20342-4:2026-02 (E)

Assistive products for tissue integrity when lying down - Part 4: Test methods for durability

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Common test equipment ... **2**

5 Test method for determining the durability of an APTI placed on an articulated support platform ... **3**

5.1 Principle ... 3

5.2 Test equipment – Test support platform ... 3

5.3 Test specifications ... 4

5.3.1 Number of cycles required ... 4

5.3.2 Evaluation criteria ... 5

5.4 Procedure ... 5

5.5 Test report ... 6

6 Test method for determining the durability of an APTI to withstand user movement ... **6**

6.1 Principle ... 6

6.2 Test equipment – Loading pad ... 6

6.3 Test specifications ... 7

6.3.1 Number of cycles required ... 7

6.3.2 Evaluation criteria ... 8

6.4 Procedure ... 8

6.5 Test report ... 9

7 Test method for determining the durability of an APTI to withstand storage and operating environmental conditions ... **9**

7.1 Principle ... 9

7.2 Test equipment – Environmental chamber ... 9

7.3 Test specifications ... 9

7.3.1 Testing conditions ... 9

7.3.2 Evaluation criteria ... 9

7.4 Procedure ... 9

7.5 Test report ... 10

8 Test method for determining the durability of an APTI to withstand user repositioning on an APTI toward the head end of a bed ... **10**

8.1 Principle ... 10

8.2 Test equipment ... 10

8.3 Test specifications ... 11

8.3.1 Testing conditions ... 11

8.3.2 Evaluation criteria ... 11

8.4 Procedure ... 12

8.5 Test report ... 12

9 Test report ... **12**

Bibliography ... **14**
