DIN SPEC 91532:2026-05 (E)

Basic process requirements for quantitative mass spectrometry analyses in medical diagnostic laboratories; Text in English

Inhalt

Seite

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Process requirements 5
4.1 General 5
4.2 General process requirements 5
4.3 Implementation process 6
4.3.1 Measurement method selection 6
4.3.2 Measurement method documentation 6
4.3.3 Validation 6
4.4 Processes for measuring of series 6
4.4.1 Series structure 6
4.4.2 Start-up 7
4.5 Processes for the release of measurement series and results 7
4.5.1 Calibration 7
4.5.2 Measuring range 7
4.5.3 Intensity of peak signals 7
4.5.4 Peak area of internal standards 7
4.5.5 Multiple fragment ions 8
4.5.6 Retention times 8
4.5.7 Peak shape 8
4.5.8 Specificity and interfering factors 8
4.5.9 Quality control sample measurements, special requirements 8
4.5.10 Exceptions in individual cases 8
4.6 Long term processes 9
4.6.1 Monitoring 9
4.6.2 Lot release 9
4.6.3 Equipment interventions 9
4.6.4 Matrix effects 9
4.6.5 Technical assessments and records 9
