Manufacturers Standardization Society

OF THE VALVE AND FITTINGS INDUSTRY

PROVIDING INDUSTRY STANDARDS SINCE 1924

This MSS Standard Practice was developed under the consensus of the MSS Technical Committee 201, *Non-Ferrous Fittings and Flanges,* and the MSS Coordinating Committee. The content of this Standard Practice is the resulting efforts of knowledgeable and experienced industry volunteers to provide an effective, clear, and non-exclusive standard that will benefit the industry as a whole. This MSS Standard Practice describes minimal requirements and is intended as a basis for common practice by the manufacturer, the user, and the industry at large. It is the responsibility of the user of this Standard Practice to establish appropriate safety and health practices and determine the applicability of regulatory requirements prior to use. The existence of an MSS Standard Practice does not in itself preclude the manufacture, sale, or use of products not conforming to the Standard Practice. Mandatory conformance to this Standard Practice is established only by reference in other documents such as a code, specification, sales contract, or public law, as applicable. MSS has no power, nor does it undertake, to enforce or certify compliance with this document. Any certification or other statement of compliance with the requirements of this Standard Practice shall not be attributable to MSS and is solely the responsibility of the certifier or maker of the statement.

"Unless indicated otherwise within this MSS Standard Practice, other standards documents referenced to herein are identified by the date of issue that was applicable to this Standard Practice at the date of approval of this MSS Standard Practice (see Annex B). This Standard Practice shall remain silent on the validity of those other standards of prior or subsequent dates of issue even though applicable provisions may not have changed."

By publication of this Standard Practice, no position is taken with respect to the validity of any potential claim(s) or of any patent rights in connection therewith. MSS shall not be held responsible for identifying any patent rights. Users are expressly advised that determination of patent rights and the risk of infringement of such rights are entirely their responsibility.

For all MSS Standard Practices, the term "shall" means "must" and "shall not" means "must not".

In this Standard Practice, all text, notes, annexes, tables, figures, and references are construed to be "normative" and essential to understand the standard's message. All appendices and footnotes, or any other information denoted as "supplemental", that may be included within this Standard Practice, DO NOT involve mandatory or normative requirements.

Converting values between the system of measurement utilized and another system of measurement may result in non-conformance with this Standard Practice.

This Standard Practice has been substantially revised from the previous 2018 edition. It is suggested that if the user is interested in knowing what changes have been made, that direct page by page comparison should be made of this document and that of the previous edition.

Non-toleranced dimensions in this Standard Practice are nominal unless otherwise specified.

Excerpts of this Standard Practice may be quoted with written permission. Credit lines should read 'Extracted from MSS SP-123-2026 with permission of the publisher, Manufacturers Standardization Society of the Valve and Fittings Industry'. Reproduction and/or electronic transmission or dissemination is prohibited under copyright convention unless written permission is granted by the Manufacturers Standardization Society of the Valve and Fittings Industry Inc. All rights reserved.

Preface

Technical Committee Membership

The MSS Technical Committee 201, *Non-Ferrous Fittings and Flanges*, has primary responsibility for this Standard Practice and included the following voting and non-voting members at the time of approval:

Chair: ***Andrew Granzow**, NIBCO, Inc.*
Vice-Chair: ***Adam Smith**, , Viega LLC*

The technical committee chair and MSS convey particular recognition to ***Kim Burton***, *Burton Consulting*, for his distinct contribution and participation in the revision of this Standard Practice.

***Rod Bayard**, Bestweld, Inc.*
***Eric Berger**, GMI Group*
***Robert M. Dilenno**, Bestweld, Inc.*
***J. Gabriel Dominguez**, Welding Outlets, Inc.*
***Jean-Paul "JP" Fay**, Viega LLC*
***Paul Gifford**, Mueller Co. LLC*
***Greg Goodson**, Aalberts Integrated Piping Systems Americas Inc.*
***Andy Granzow**, NIBCO, Inc.*
***Getnet Hailegiorgis**, Westbrook Manufacturing*
***Chad Harbour**, Mueller Co. LLC*
***Tim Harrigan**, Bonney Forge Corporation*
***Paul Heald**, Bonney Forge Corporation*
***Katie Hendricks**, Welding Outlets, Inc.*
***Howard Houston**, Westbrook Manufacturing*
***Gregory Johnson**, United Valve*
***Derick Laws**, Westbrook Manufacturing*
***Ignacio Lopez**, FloWorks USA LP*
***Jeff Matson**, Viega LLC*
***Mahmoud Mohamed**, Seismic Stop Solutions Industries*
***Tim Narel**, Milwaukee Valve Company*
***Rock Powell**, Mueller Co. LLC*
***Adam Smith**, Viega LLC*
