DIN SPEC 91528:2026-08 (E)

Application-Oriented Transparency Requirements for AI Systems; Text in English

Contents

Page

Foreword 5

Introduction 7

1 Scope 9

2 Normative references 10

3 Terms and definitions 10
3.1 General terms and definitions 10
3.2 Terms and definitions related to the provided methodology 14
3.3 Additional terms relevant to European regulation 15

4 Guiding questions for analysing transparency requirements 17
4.1 Basic rationale and methodology for implementing transparency requirements 17
4.2 Detailed analysis of guiding questions 18
4.2.1 General 18
4.2.2 What?/Which content? 19
4.2.3 Why? 19
4.2.4 Which Impact? 20
4.2.5 Who – from? 21
4.2.6 Who – to? 22
4.2.7 How? 22
4.2.8 When?/At which stage of the lifecycle? 23
4.2.9 Which context? 25

5 Categories of transparency 26
5.1 Relationship between categories and guiding questions 26
5.2 List of categories for each guiding question 27
5.2.1 What?/Which content? 27
5.2.2 Why? 32
5.2.3 Which impact? 33
5.2.4 Who – from? 34
5.2.5 Who – to? 34
5.2.6 How? 35
5.2.7 When/at which stage of the lifecycle? 36
5.2.8 Which context? 37
5.3 Overview of transparency categories 38

6 Application scenarios 38
6.1 General 38
6.2 Different levels of application scenarios 39
6.2.1 General 39
6.2.2 First level 39
6.2.3 Second level 39
6.2.4 Third level 39
6.3 Examples of high-level application scenarios 39
6.3.1 General 39
6.3.2 Systematic collection of transparency requirements for a specific regulation 40
6.3.3 Definition of a process for implementing transparency requirements by a company 40
6.3.4 Systematic collection and implementation of transparency requirements for a concrete AI system 40

6.3.5 Compilation of important information for users as a trustworthiness label for an AI system ... 40
6.3.6 AI model cards, system cards, testing cards ... 41
6.3.7 Further variations of high-level application scenarios ... 41
6.3.8 Concrete settings/use cases ... 42
6.4 Examples of coding schemes ... 43

7 Use-Cases ... 45
7.1 General ... 45
7.2 Example: Transparency requirements in the EU AI Act for high-risk AI systems ... 45

Annex A (informative) Supporting concepts ... 51
A.1 Supporting concepts for transparency in AI systems ... 51
A.2 Distinct definitions regarding transparency ... 51
A.3 Terminological background according to DIN EN ISO/IEC 22989 ... 52
A.4 Transparency and explainability as mitigation mechanisms ... 53
A.5 Usage of existing concepts in this document ... 53

Annex B (informative) Additional use cases ... 55
B.1 General ... 55
B.2 Example: Diagnostic tool in healthcare — 'Tele Dermatology app' (derma app) ... 55
B.2.1 Basic description of the use case ... 55
B.2.2 Analysis of guiding questions for the use case ... 55
B.3 Example: AI-based recommender system for supply decisions ... 59
B.3.1 General ... 59
B.3.2 Basic description of the use case ... 59
B.3.3 Considerations about compliance regarding the EU AI Act ... 59
B.3.4 List of categories for this use case ... 59
B.3.5 Elaboration of transparency requirements based on the provided categories ... 67
B.3.6 Example: AI System Card — AI system for assembly and disassembly in Human-Robot Collaboration (HRC) ... 69

Annex C (informative) AI system lifecycle ... 77
C.1 Overview AI system lifecycle model (DIN EN ISO/IEC 22989:2024, Clause 6) ... 77

Bibliography ... 79

Figures

Figure 1 — Guiding Questions: Overview for guiding questions to elaborate requirement for transparency/provision of appropriate information ... 18

Figure 2 — Overview Content: Categories/elements of information for guiding question "What/which content?" ... 28

Figure 3 — Overview categories: Overview about categories/elements of information for all guiding questions ... 38

Figure 4 — Content AI Act, Art 13: Requirements for guiding question "What/which content?" regarding the items listed in the EU AI Act, Article 13 ... 50

Figure B.1 — First Level AI Card: Standardised AI system card with defining questions to describe AI systems in general ... 72

Figure B.2 — Second Level AI Card: Application-specific AI system card for the HRC use case with defining questions to describe AI systems in general ... 76

Figure C.1 — Example AI system lifecycle model with AI [DIN EN ISO/IEC 22989:2024, 6.1, Figure 4] ... 78

Tables

Table B.1 — Building Blocks: Structured list of building blocks and defining questions of the standardised AI system card to describe AI models/AI systems..... 72
