ISO/IEC 10192-1:2002-08 (E)

Information technology_- Home electronic system (HES) interfaces_- Part_1: Universal Interface (UI) Class_1

CONTENTS

FOREWORD 4
1 Scope and application 5
1.1 Scope 5
1.2 Application 5
2 Normative references 5
3 Definitions and abbreviations 6
3.1 Definitions 6
3.2 Abbreviations 7
4 Principles of the UI 8
5 Connectors and cabling 9
5.1 Mechanical characteristics 9
5.1.1 UI NAU connector housing and connector 9
5.1.2 UI cabling 9
5.2 Electrical characteristics 11
5.2.1 UI NAU interface 11
5.2.2 Electrical signal 14
5.2.3 Power output 15
6 Procedural requirements 15
6.1 FT 1.2 Control field 16
6.1.1 Control field from primary station 16
6.1.2 Control field from secondary station 17
6.2 FT 1.2 Checksum field 17
6.3 FT 1.2 Field codification 17
6.4 FT 1.2 transmission rules 17
6.4.1 Frame with fixed length 17
6.4.2 Frame with variable length 18
6.4.3 Single character frame 18
6.5 Transmission procedure 18
6.6 Transmission errors 18
6.6.1 Error management 18
7 UI NAU resources for the UI 19
7.1 General 19
7.2 Local and destination addresses 19
7.3 Transmit and receive buffers 19
7.3.1 UI NAU registers 20
7.3.2 Status register (S_R) 20
7.3.3 Function mode register (FM_R) 21
8 Command structure 21
8.1 Frame format FT 1.2 language structure 22
8.1.1 Management commands using fixed length 22
8.1.2 Frame with variable length 23
8.1.3 Control sequences specification 24
8.2 Command specifications 25
8.3 Command identifiers coding 28

9 UI operational procedure 28
9.1 Point-to-point communication link initialisation 28
9.2 Negotiation capabilities 29
9.2.1 Communication speed negotiation 29
9.2.2 Negotiation procedure 29
9.3 Polling message 30

Annex A (informative) Home control systems that do not provide power from the network 31
Annex B (informative) Illustration of UI operational procedure 32

Figure 1 – UI connections in a home network providing a power feed service 8
Figure 2 – UI cables 10
Figure 3 – NP UI cable 12
Figure 4 – SP UI cable 13
Figure 5 – Connection of an SPD to a home control network that does not provide power 13
Figure 6 – Test circuit for timing characteristics of optocouplers 15
Figure 7 – FT 1.2 frame format 16
Figure 8 – Transmit and receive buffers 19
Figure 9 – Status register 20
Figure 10 – Function mode register 21
Figure 11 – Communication speed parameter 29
Figure 12 – Negotiation procedure 29
Figure 13 – Polling message 30
Figure A.1 – Function mode register 31
