Version History . . . 3
1. Scope . . . 4
1.1. OCPP 2.1 Edition 1 . . . 4
2. Conventions, Terminology and Abbreviations . . . 5
2.1. Conventions . . . 5
2.2. Terminology . . . 6
2.3. Abbreviations . . . 9
2.4. Actors . . . 10
2.5. References . . . 12
2.6. Definition of Transaction . . . 14
2.7. ISO 15118 support . . . 14
3. Generic Requirements . . . 16
3.1. Time Format Requirements . . . 17
3.2. Message Timeouts . . . 17
3.3. Language support . . . 17
A. Security . . . 19
1. OCPP Security . . . 20
1.1. Security Objectives . . . 20
1.2. Design Considerations . . . 20
1.3. Security Profiles . . . 21
1.4. Keys used in OCPP . . . 29
1.5. Certificate Revocation . . . 31
1.6. Installation . . . 31
2. Use cases & Requirements . . . 33
A01 - Update Charging Station Password for HTTP Basic Authentication . . . 33
A02 - Update Charging Station Certificate by request of CSMS . . . 34
A03 - Update Charging Station Certificate initiated by the Charging Station . . . 39
A04 - Security Event Notification . . . 45
A05 - Upgrade Charging Station Security Profile . . . 46
B. Provisioning . . . 48
1. Introduction . . . 49
1.1. Transactions before being accepted by a CSMS . . . 49
2. Use cases & Requirements . . . 50
2.1. Booting a Charging Station . . . 50
B01 - Cold Boot Charging Station . . . 50
B02 - Cold Boot Charging Station - Pending . . . 53
B03 - Cold Boot Charging Station - Rejected . . . 55
B04 - Offline Behavior Idle Charging Station . . . 57
2.2. Configuring a Charging Station . . . 58
B05 - Set Variables . . . 58
B06 - Get Variables . . . 61
B07 - Get Base Report . . . 63
B08 - Get Custom Report . . . 66
B09 - Setting a new NetworkConnectionProfile . . . 69

B10 - Migrate to new CSMS . . . 73
2.3. Resetting a Charging Station . . . 74
B11 - Reset - Without Ongoing Transaction . . . 75
B12 - Reset - With Ongoing Transaction . . . 78
B13 - Reset - With Ongoing Transaction - Resuming Transaction . . . 81
C. Authorization . . . 85
1. Introduction . . . 86
1.1. ID Tokens . . . 86
1.2. Group ID Tokens . . . 86
1.3. Authorization Cache . . . 87
1.4. Local Authorization List . . . 87
1.5. Unknown Offline Authorization . . . 87
1.6. Relationship between authorization and transaction . . . 88
2. Use cases & Requirements . . . 89
2.1. Authorization options . . . 89
C01 - EV Driver Authorization using RFID . . . 89
C02 - Authorization using a start button . . . 93
C03 - Authorization using credit/debit card . . . 95
C04 - Authorization using PIN-code . . . 96
C05 - Authorization for CSMS initiated transactions . . . 98
C06 - Authorization using local id type . . . 100
2.2. ISO 15118 Authorization . . . 102
C07 - Authorization using Contract Certificates . . . 102
C08 - Authorization at EVSE using ISO 15118 External Identification Means (EIM) . . . 106
2.3. GroupId . . . 109
C09 - Authorization by GroupId . . . 109
2.4. Authorization Cache . . . 111
C10 - Store Authorization Data in the Authorization Cache . . . 111
C11 - Clear Authorization Data in Authorization Cache . . . 113
C12 - Start Transaction - Cached Id . . . 114
2.5. Local Authorization list . . . 115
C13 - Offline Authorization through Local Authorization List . . . 115
C14 - Online Authorization through Local Authorization List . . . 117
2.6. Offline Authorization . . . 118
C15 - Offline Authorization of unknown Id . . . 119
2.7. Master Pass . . . 121
C16 - Stop Transaction with a Master Pass . . . 121
2.8. Authorization with prepaid card . . . 123
C17 - Authorization with prepaid card . . . 124
2.9. Ad hoc payments . . . 127
C18 - Authorization using locally connected payment terminal . . . 128
C19 - Cancelation prior to transaction . . . 131
C20 - Cancelation after start of transaction . . . 133
C21 - Settlement at end of transaction . . . 135
C22 - Settlement is rejected or fails . . . 138
C23 - Increasing authorization amount . . . 140
C24 - Ad hoc payment via stand-alone payment terminal . . . 141
C25 - Ad hoc payment via a QR code . . . 144
D. Local Authorization List Management . . . 153
1. Introduction . . . 154
2. Use cases & Requirements . . . 155
D01 - Send Local Authorization List . . . 155
D02 - Get Local List Version . . . 158
E. Transactions . . . 159
1. Introduction . . . 160
1.1. Flexible transaction start/stop . . . 160
1.2. TransactionId generation . . . 161
1.3. Delivering transaction-related messages . . . 161
1.4. Authorization . . . 162
1.5. Clarification for optional fields in TransactionEventRequest . . . 162

2. Use cases & Requirements . . . 164
2.1. OCPP transaction mechanism . . . 164
E01 - Start Transaction options . . . 164
E02 - Start Transaction - Cable Plugin First . . . 171
E03 - Start Transaction - IdToken First . . . 176
E04 - Transaction started while Charging Station is offline . . . 179
E05 - Start Transaction - Id not Accepted . . . 182
E06 - Stop Transaction options . . . 185
E07 - Transaction locally stopped by IdToken . . . 190
E08 - Transaction stopped while Charging Station is offline . . . 194
E09 - When cable disconnected on EV-side: Stop Transaction . . . 197
E10 - When cable disconnected on EV-side: Suspend Transaction . . . 200
E11 - Connection Loss During Transaction . . . 204
E12 - Inform CSMS of an Offline Occurred Transaction . . . 206
E13 - Transaction-related message not accepted by CSMS . . . 208
E14 - Check transaction status . . . 210
2.2. Interrupting and Stopping ISO 15118 Charging . . . 211
E15 - End of charging process . . . 211
2.3. Transactions with limits . . . 213
E16 - Transactions with fixed cost, energy, SoC or time . . . 213
2.4. Resuming transactions . . . 217
E17 - Resuming transaction after forced reboot . . . 217
F. Remote Control . . . 221
1. Introduction . . . 222
2. Use cases & Requirements . . . 223
2.1. Remote Transaction Control . . . 223
F01 - Remote Start Transaction - Cable Plugin First . . . 223
F02 - Remote Start Transaction - Remote Start First . . . 226
F03 - Remote Stop Transaction . . . 232
F04 - Remote Stop ISO 15118 Charging from CSMS . . . 234
2.2. Unlock Connector . . . 236
F05 - Remotely Unlock Connector . . . 236
2.3. Remote Trigger . . . 238
F06 - Trigger Message . . . 238
F07 - Remote start with fixed cost, energy, SoC or time . . . 240
G. Availability . . . 243
1. Introduction . . . 244
2. Use cases & Requirements . . . 245
G01 - Report connector AvailabilityState . . . 245
G02 - Heartbeat . . . 247
G03 - Change Availability EVSE/Connector . . . 249
G04 - Change Availability Charging Station . . . 251
G05 - Lock Failure . . . 253
H. Reservation . . . 254
1. Introduction . . . 255
2. Use cases & Requirements . . . 256
H01 - Reservation . . . 256
H02 - Cancel Reservation . . . 260
H03 - Use a reserved EVSE . . . 261
H04 - Reservation Ended, not used . . . 265
I. Tariff And Cost . . . 266
1. Introduction . . . 267
1.1. Configuration Settings . . . 267
1.2. Tariff Structures . . . 267
1.3. CostDetails . . . 271
2. Use cases & Requirements . . . 274
I01 - Show EV Driver-specific Tariff Information . . . 274
I02 - Show EV Driver Running Total Cost During Charging . . . 275
I03 - Show EV Driver Final Total Cost After Charging . . . 276
I04 - Show Fallback Tariff Information . . . 277
I05 - Show Fallback Total Cost Message . . . 279

I06 - Update Tariff Information During Transaction . . . 280
I07 - Local Cost Calculation - Set Default Tariff . . . 281
I08 - Local Cost Calculation - Receive Driver Tariff . . . 284
I09 - Local Cost Calculation - Get Tariffs . . . 290
I10 - Local Cost Calculation - Clear Tariffs . . . 292
I11 - Local Cost Calculation - Change transaction tariff . . . 293
I12 - Local Cost Calculation - Cost Details of Transaction . . . 295
J. Meter Values . . . 300
1. Introduction . . . 301
2. Configuration . . . 302
2.1. Transaction Meter Values . . . 302
2.2. Clock-Aligned Meter Values . . . 302
2.3. Multiple Locations/Phases . . . 303
2.4. Signed Meter Values . . . 303
2.5. Configuration Examples . . . 304
3. Use cases & Requirements . . . 305
3.1. MeterValues . . . 305
J01 - Sending Meter Values not related to a transaction . . . 305
J02 - Sending transaction related Meter Values . . . 308
3.2. ISO 15118 MeterValue signing . . . 310
J03 - Charging Loop with metering information exchange . . . 310
K. Smart Charging . . . 312
1. Introduction . . . 313
2. Types of Smart Charging . . . 314
2.1. Internal Load Balancing . . . 314
2.2. Central Smart Charging . . . 314
2.3. Local Smart Charging . . . 314
2.4. External Smart Charging Control Signals . . . 315
3. Charging profiles . . . 317
3.1. Introduction . . . 317
3.2. Charging profile purposes . . . 317
3.3. Charging profile kind . . . 318
3.4. Smart Charging Operation Modes . . . 318
3.5. Stacking charging profiles . . . 319
3.6. Combining Charging Profile Purposes . . . 320
3.7. Example Charging Profile . . . 320
3.8. Avoiding Phase Conflicts . . . 322
3.9. Using randomized delays in schedule periods . . . 323
4. Smart Charging Signals to a Charging Station from Multiple Actors . . . 324
5. Use cases & Requirements . . . 326
5.1. General Smart Charging . . . 326
K01 - SetChargingProfile . . . 326
K02 - Central Smart Charging . . . 335
K03 - Local Smart Charging . . . 339
K04 - Internal Load Balancing . . . 343
K05 - Remote Start Transaction with Charging Profile . . . 344
K06 - Offline Behavior Smart Charging During Transaction . . . 345
K07 - Offline Behavior Smart Charging at Start of Transaction . . . 347
K08 - Get Composite Schedule . . . 348
K09 - Get Charging Profiles . . . 350
K10 - Clear Charging Profile . . . 351
5.2. External Charging Limit based Smart Charging . . . 354
K11 - Set / Update External Charging Limit With Ongoing Transaction . . . 354
K12 - Set / Update External Charging Limit Without Ongoing Transaction . . . 356
K13 - Reset / Release External Charging Limit . . . 357
K14 - External Charging Limit with Local Controller . . . 359
K23 - Smart Charging with EMS connected to Charging Stations . . . 360
K24 - Smart Charging with EMS connected to Local Controller . . . 362
K25 - Smart Charging with EMS acting as a Local Controller . . . 364
K26 - Smart Charging with Hybrid Local & Cloud EMS . . . 366
K27 - Smart Charging with EMS and LocalGeneration . . . 369

5.3. ISO 15118 based Smart Charging . . . 373
K15 - ISO 15118-2 Charging with load leveling . . . 373
K16 - Renegotiation initiated by CSMS . . . 376
K17 - Renegotiation initiated by EV . . . 379
K18 - ISO 15118-20 Scheduled Control Mode . . . 383
K19 - ISO 15118-20 Dynamic Control Mode . . . 387
K20 - ISO 15118-20 Adjusting charging schedule when energy needs change . . . 391
5.4. Priority Charging . . . 393
K21 - Requesting priority charging remotely . . . 393
K22 - Requesting priority charging locally . . . 395
5.5. Dynamic Charging Profiles . . . 396
K28 - Dynamic charging profiles from CSMS . . . 397
K29 - Dynamic charging profiles from external system . . . 399
L. Firmware Management . . . 403
1. Introduction . . . 404
2. Use cases & Requirements . . . 405
L01 - Secure Firmware Update . . . 405
L02 - Non-Secure Firmware Update . . . 411
L03 - Publish Firmware file on Local Controller . . . 416
L04 - Unpublish Firmware file on Local Controller . . . 418
M. Certificate Management . . . 420
1. Introduction . . . 421
2. ISO 15118 Certificates . . . 426
2.1. ISO 15118 Certificate structure . . . 426
2.2. Using ISO 15118 Certificates in OCPP . . . 427
2.3. 15118 communication set-up . . . 428
2.4. Certificate - Use Case mapping . . . 428
3. Use cases from ISO 15118 relevant for OCPP . . . 430
4. Use cases & Requirements . . . 431
M01 - Certificate installation EV . . . 431
M02 - Certificate Update EV . . . 433
M03 - Retrieve list of available certificates from a Charging Station . . . 434
M04 - Delete a specific certificate from a Charging Station . . . 435
M05 - Install CA certificate in a Charging Station . . . 437
M06 - Get V2G Charging Station Certificate status . . . 438
M07 - Get Vehicle Certificate Chain Revocation Status . . . 440
N. Diagnostics . . . 443
1. Introduction . . . 444
2. Use cases & Requirements . . . 445
2.1. Logging . . . 445
N01 - Retrieve Log Information . . . 445
2.2. Configure Monitoring . . . 448
N02 - Get Monitoring report . . . 448
N03 - Set Monitoring Base . . . 450
N04 - Set Variable Monitoring . . . 452
N05 - Set Monitoring Level . . . 454
N06 - Clear / Remove Monitoring . . . 455
2.3. Monitoring Events . . . 456
N07 - Alert Event . . . 456
N08 - Periodic Event . . . 459
2.4. Customer Information . . . 461
N09 - Get Customer Information . . . 461
N10 - Clear Customer Information . . . 462
2.5. Frequent Periodic Variable Monitoring . . . 465
N11 - Set Frequent Periodic Variable Monitoring . . . 465
N12 - Get Periodic Event Streams . . . 467
N13 - Close Periodic Event Streams . . . 467
N14 - Adjust Periodic Event Streams . . . 468
N15 - Periodic Event Streams . . . 469
O. Display Message . . . 472
1. Introduction . . . 473

2. Use cases & Requirements . . . 474
O01 - Set DisplayMessage . . . 474
O02 - Set DisplayMessage for Transaction . . . 477
O03 - Get All DisplayMessages . . . 479
O04 - Get Specific DisplayMessages . . . 481
O05 - Clear a DisplayMessage . . . 483
O06 - Replace DisplayMessage . . . 484
P. DataTransfer . . . 485
1. Introduction . . . 486
2. Use cases & Requirements . . . 487
P01 - Data Transfer to the Charging Station . . . 487
P02 - Data Transfer to the CSMS . . . 489
Q. Bidirectional Power Transfer . . . 491
1. Introduction . . . 492
2. Smart Charging Extensions for V2X . . . 493
2.1. Setpoint and charge/discharge limits . . . 493
2.2. V2X operation modes . . . 493
2.3. Switching V2X operation modes . . . 498
2.4. Residual measurand . . . 498
2.5. Generic smart charging rules for V2X . . . 499
3. Use Cases & Requirements . . . 500
Q01 - V2X Authorization . . . 500
Q02 - Starting in operationMode ChargingOnly before enabling V2X . . . 504
Q03 - Central V2X control with charging schedule . . . 507
Q04 - Central V2X control with dynamic CSMS setpoint . . . 509
Q05 - External V2X setpoint control with a charging profile from CSMS . . . 512
Q06 - External V2X control with a charging profile from an External System . . . 513
Q07 - Central V2X control for frequency support . . . 517
Q08 - Local V2X control for frequency support . . . 518
Q09 - Local V2X control for load balancing . . . 522
Q10 - Idle, minimizing energy consumption . . . 524
Q11 - Going offline during V2X operation . . . 526
Q12 - Resuming a V2X operation after an offline period . . . 527
R. DER Control . . . 529
1. Introduction . . . 530
2. DER Control using OCPP and ISO 15118-20 . . . 531
2.1. CSO acting as aggregator . . . 531
2.2. DER Control for DC bidirectional power transfer . . . 531
2.3. DER Control for AC bidirectional power transfer . . . 532
2.4. ISO 15118 V2G-AC inverter architecture . . . 532
2.5. ISO 15118 V2G-Split inverter architecture . . . 532
2.6. DER nameplate information . . . 533
2.7. DER controls . . . 533
2.8. DER alarms . . . 536
2.9. Prioritizing of controls . . . 536
3. Use Cases for DER control . . . 538
R01 - Starting a V2X session with DER control in EVSE . . . 538
R02 - Starting a V2X session with DER control in EV . . . 541
R03 - Starting a V2X session with hybrid DER control in both EV and EVSE . . . 544
R04 - Configure DER control settings at Charging Station . . . 547
R05 - Charging station reporting a DER event . . . 552
S. Battery Swapping . . . 555
1. Introduction . . . 556
2. Availability states for a battery slot . . . 557
3. Use cases for Battery Swapping . . . 558
S01 - Battery Swap Local Authorization . . . 558
S02 - Battery Swap Remote Start . . . 559
S03 - Battery Swap In/Out . . . 560
S04 - Battery Swap Charging . . . 562
Messages, Datatypes & Enumerations . . . 565
1. Messages . . . 566
1.1. AdjustPeriodicEventStream . . . 566

1.2. AFRRSignal . . . 566
1.3. Authorize . . . 566
1.4. BatterySwap . . . 567
1.5. BootNotification . . . 567
1.6. CancelReservation . . . 568
1.7. CertificateSigned . . . 568
1.8. ChangeAvailability . . . 569
1.9. ChangeTransactionTariff . . . 570
1.10. ClearCache . . . 570
1.11. ClearChargingProfile . . . 570
1.12. ClearDERControl . . . 571
1.13. ClearDisplayMessage . . . 571
1.14. ClearedChargingLimit . . . 572
1.15. ClearTariffs . . . 572
1.16. ClearVariableMonitoring . . . 572
1.17. ClosePeriodicEventStream . . . 573
1.18. CostUpdated . . . 573
1.19. CustomerInformation . . . 573
1.20. DataTransfer . . . 574
1.21. DeleteCertificate . . . 575
1.22. FirmwareStatusNotification . . . 575
1.23. Get15118EVCertificate . . . 575
1.24. GetBaseReport . . . 576
1.25. GetCertificateChainStatus . . . 577
1.26. GetCertificateStatus . . . 577
1.27. GetChargingProfiles . . . 578
1.28. GetCompositeSchedule . . . 578
1.29. GetDERControl . . . 579
1.30. GetDisplayMessages . . . 579
1.31. GetInstalledCertificateIds . . . 580
1.32. GetLocalListVersion . . . 580
1.33. GetLog . . . 580
1.34. GetMonitoringReport . . . 581
1.35. GetPeriodicEventStream . . . 582
1.36. GetReport . . . 582
1.37. GetTariffs . . . 582
1.38. GetTransactionStatus . . . 583
1.39. GetVariables . . . 583
1.40. Heartbeat . . . 583
1.41. InstallCertificate . . . 584
1.42. LogStatusNotification . . . 584
1.43. MeterValues . . . 585
1.44. NotifyAllowedEnergyTransfer . . . 585
1.45. NotifyChargingLimit . . . 586
1.46. NotifyCustomerInformation . . . 586
1.47. NotifyDERAlarm . . . 586
1.48. NotifyDERStartStop . . . 587
1.49. NotifyDisplayMessages . . . 587
1.50. NotifyEVChargingNeeds . . . 588
1.51. NotifyEVChargingSchedule . . . 588
1.52. NotifyEvent . . . 589
1.53. NotifyMonitoringReport . . . 589
1.54. NotifyPeriodicEventStream . . . 590
